The objective of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) is to facilitate an exchange of information on best practices for the latest research advances in the area of communications, networks and intelligence applications. These mainly involve computer science and engineering, informatics, communications and control, electrical engineering, information computing, and business intelligence and management. Proceedings of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) will focus on green information technology and applications, which will provide in-depth insights for engineers and scientists in academia, industry, and government. The book addresses the most innovative research developments including technical challenges, social and economic issues, and presents and discusses the authors' ideas, experiences, findings, and current projects on all aspects of advanced green information technology and applications. Yuhang Yang is a professor at the Department of Electronic Engineering, Shanghai Jiao Tong University. Maode Ma is an associate professor at the School of Electrical & Electronic Engineering, Nanyang Technological University.

RAND studied 89 modern insurgency cases to test conventional understanding about how insurgencies end. Findings relevant to policymakers and analysts include that modern insurgencies last about ten years; withdrawal of state support cripples insurgencies; civil defense forces are useful for both sides; pseudodemocracies fare poorly against insurgents; and governments win more often in the long run.

Throughout this lively and concise historical account of Mao Zedong's life and thought, Rebecca E. Karl places the revolutionary leader's personal experiences, social visions and theory, military strategies, and developmental and foreign policies in a dynamic narrative of the Chinese revolution. She situates Mao and the revolution in a global setting informed by imperialism, decolonization, and third worldism, and discusses worldwide trends in politics, the economy, military power, and territorial sovereignty. Karl begins with Mao's early life in a small village in Hunan province, documenting his relationships with his parents, passion for education, and political awakening during the fall of the Qing dynasty in late 1911. She traces his transition from liberal to Communist over the course of the next decade, his early critiques of the subjugation of women, and the gathering force of the May 4th movement for reform and radical change. Describing Mao's rise to power, she delves into the dynamics of Communist organizing in an overwhelmingly agrarian society, and Mao's confrontations with Chiang Kaishek and other nationalist conservatives. She also considers his marriages and romantic liaisons and their relation to Mao as the revolutionary founder of Communism in China. After analyzing Mao's stormy tenure as chairman of the People's Republic of China, Karl concludes by examining his legacy in China from his death in 1976 through the Beijing Olympics in 2008.

Neorealists argue that all states aim to acquire power and that state cooperation can therefore only be temporary, based on a common opposition to a third country. This view condemns the world to endless conflict for the indefinite future. Based upon careful attention to actual historical outcomes, this book contends that, while some countries and leaders have demonstrated excessive power drives, others have essentially underplayed their power and sought less position and influence than their comparative strength might have justified. Featuring case studies from across the globe, History and Neorealism examines how states have actually acted. The authors conclude that leadership, domestic politics, and the domain (of gain or loss) in which they reside play an important role along with international factors in raising the possibility of a world in which conflict does not remain constant and, though not eliminated, can be progressively reduced.

This book examines the volatile landscape of the Chinese economy and the barriers to its continuing development. The author argues that underlying inefficiencies in China's financial system currently prevent the further growth of its institutions and inhibit reform of monetary and fiscal policy. Rambures shows that, despite efforts to avoid a 'middle income trap', such long-overdue structural reforms are still faced with strong resistance from both economic and political circles. Chapters discuss approaches in tackling the Chinese national debt, the recent stock exchange collapse and subsequent currency devaluation, declining trade surplus, the wariness of foreign investors and its negative impact on foreign exchange reserves, and the heavy burden of state-owned 'zombie companies'. The discussion positions current economic events within the context of China's transition from a foreign trade and investment-led economy to one that is propelled by domestic consumption, service industries and innovation. Crucially, Rambures also addresses financial trends with reference to pervasive long-term influencing factors such as an ageing population, increasing inequality, corruption, pollution and migration.

Since the end of World War II, there have been 181 insurgencies around the world. In fact, most modern warfare occurs in the form of insurgencies, including in such high-profile countries as Iraq, Syria, Libya, Afghanistan, and Ukraine. However, in spite of their prevalence, we still know relatively little about how insurgencies function. With more than three dozen violent insurgencies currently taking place today, a deeper understanding of insurgent groups is more important than ever. In Waging Insurgent Warfare, Seth G. Jones offers new insights into the dynamics of insurgent groups. Jones weaves together examples from current events and recent history to identify the factors that contribute to the rise of an insurgency, the key components involved in conducting an insurgency, from selecting an organizational structure to securing aid from an outside source, and the elements that contribute to the end of insurgencies. Through examining the strategies, tactics, and campaigns that insurgents use, as well as how these factors relate to each other on the ground, Jones provides a comprehensive understanding of the ways in which insurgent groups operate. Empirically rich and historically informed, Waging Insurgent Warfare features data on over one hundred factors for every insurgency that has taken place between 1946 and 2015. While the primary emphasis revolves around insurgency, the findings in this book also have important implications for waging counterinsurgent warfare. Bringing together the existing body of knowledge on insurgencies, Jones provides a practical, accessible resource to help understand insurgent warfare. The definitive resource on insurgency, Waging Insurgent Warfare will appeal to anyone with an interest in insurgency, counterinsurgency, or modern war.

Collins New GCSE Maths Edexcel Linear Teacher's Pack Higher 1 contains everything you need to deliver effective lessons in mathematics with confidence for students working at Grades D to A*. Fully matched to Edexcel's new GCSE Maths Linear specification, these teacher resources offer well-differentiated lesson plans and additional support. The Teacher's Pack allows you to: * Capture the essence of chapters at a glance with chapter overviews * Easily access learning objectives and references to exam board specifications, KS4 Programme of Study, Functional Skills Standards and Personal Learning and Thinking Skills (PLTS) for each chapter * Link maths concepts and help students to access functional and problem-solving scenarios * Raise standards by providing the right level of progression for every student by using the well-differentiated lesson plans * Involve the whole class in engaging activities and discussions using the Starter * Lead students into the main concepts and exercises with the Main Lesson Activity * Consolidate and summarise learning using the Plenary * Quickly access the answers to all questions in the corresponding Student Book and Homework Book * Plan ahead and save time using the ready-made Scheme of Work * Customise your lessons

using Lesson Plans in Word format on the CD-Rom

On the fiftieth anniversary of Quotations from Chairman Mao, this pioneering volume examines the book as a global historical phenomenon.
