Data from Fertilizers Europe. This is a harmonized data source. Data are available at NUTS0 for EU, the United Kingdom and Norway. Data from Fertilizers Europe relate to crop years (t-1/t) which are reported under year t-1. Data were originally received in kilo tonnes of nitrogen (N), phosphate (P<sub>2</sub>O<sub>5</sub>) and potash (K<sub>2</sub>O).

---

Agri-environmental indicator - European Commission million t (17 %). According to Fertilizer Europe, the EU production of fertilisers is relatively small measured as share of the global production: 9 % of the nitrogen, 3 % of the phosphate and 8 % of the potash is produced within the EU. Globally, urea is by far the most used fertiliser

25 Year Environment Plan - GOV.UK

Nitrogen (N) fertilizers are produced chemically using natural gas and hydrogen that is contained in the air. Ammonia is produced by mixing nitrogen and hydrogen gases in the presence of heat, pressure and a catalyst compound. Urea Methodology. Urea is the most widely-produced and commonly-traded nitrogen fertilizer.

The Sluiskil site has been located since 1929 on the Ghent-Terneuzen canal, a major waterway opening through the Western Scheldt into the North Sea and connecting to European waterways. As with many European fertiliser complexes, development of the site was linked to the availability of coke oven gas from a neighboring coke factory.

Presenting the first continental-scale assessment of reactive nitrogen in the environment, this book sets the related environmental problems in context by providing a multidisciplinary introduction to the nitrogen cycle processes. Issues of upscaling from farm plot and city to national and continental scales are addressed in detail with emphasis on opportunities for better management at local to global levels. The five key societal threats posed by reactive nitrogen are assessed, providing a framework for joined-up management of the nitrogen cycle in Europe, including the first cost-benefit analysis for different reactive nitrogen forms and future scenarios. Incorporating comprehensive maps, a handy technical synopsis and a summary for policy makers, this landmark volume is an essential reference for academic researchers across a wide range of disciplines, as well as stakeholders and policy makers. It is also a valuable tool in communicating the key environmental issues and future challenges to the wider public.

## Read Book 25 Years Fertilizers Europe

This is the first comprehensive guide to the workings of an industry of crucial importance to the world's agricultural economy. Published in association with the International Fertilizer Industry Association, The fertilizer industry looks at the structure of the industry for all the key categories of fertilizer products including nitrogen, phosphate and potash fertilizers. It covers their production and end use, their implications for the environment and considers the patterns and future of the international trade.
