Power Electronics and Motor Drives: Advances and Trends, Second Edition is the perfect resource to keep the electrical engineer up-to-speed on the latest advancements in technologies, equipment and applications. Carefully structured to include both traditional topics for entry-level and more advanced applications for the experienced engineer, this reference sheds light on the rapidly growing field of power electronic operations. New content covers converters, machine models and new control methods such as fuzzy logic and neural network control. This reference will help engineers further understand recent technologies and gain practical understanding with its inclusion of many industrial applications. Further supported by a glossary per chapter, this book gives engineers and researchers a critical reference to learn from real-world examples and make future decisions on power electronic technology and applications. Provides many practical examples of industrial applications Updates on the newest electronic topics with content added on fuzzy logic and neural networks Presents information from an expert with decades of research and industrial experience

The relationship between the architectural representation and its intended product - a building - has undergone a profound transformation over the centuries. Before the age of modern technology, the systematically predictive role of architectural drawing so taken for granted today was less dominant in the evolution from architectural idea to built work. The age of computer-aided design has brought with it a stricter standard of fidelity. However, contemporary architecture need not simply accept the inevitability of a technological imperative. This book demonstrates that representation is never a neutral tool or mere picture of a future building.

High Quality Hexagonal Graph Paper Notebook for chemistry notes and practice. This notebook can also be used for mapping, crafting and quilting, architecture, drawing and sketching, and more. 8.5x11" 109 pages light hexagonal grid throughout the notebook Use as Math and Science Notebook, Graphing & Drawing or Sketch Journal Fast delivery Ideal for chemistry notes and practice, or even just some fun calming zen artistic coloring and doodling.

"Sequel to her ... wartime autobiography, 'One woman's war', Eileen Youngusband charts her ninety-two years, from the 1920s to the present day, through the truly extraordinary men she has met ... Giving a unique, intimate and personal perspective on some of the most influential men of the twentieth century, as well as some characters hitherto unknown, Eileen wrote about Winston Churchill, Rex Harrison, Dylan Thomas, members of NASA, musicians at Glyndebourne, actors, caterers, soldiers, politicians and even Idi Amin"--Publisher's description.
