## *Thermal Plasma* Processing P 24

Atmospheric pressure non-thermal plasma can be used to promote chemical reactions. Collisions between hot temperature electrons and cold gas molecules can lead to dissociation reactions and the subsequent formation of radicals. This kind of

discharge exhibits reacting properties that are usually seen in high temperature discharge systems.

*Nonthermal plasma - Wikipedia*

If the rate of energy transfer from the plasma electrons to the neutral gas is limited, and/or cooling of the gas is

# Read PDF Atmospheric Pressure Non Thermal

fast and effective, then the electron temperature significantly exceeds that of neutrals ( $T_e \gg T_0$ ) and the plasma becomes non-thermal and strongly non-equilibrium. Most of the conventional non-thermal plasma discharges are organized at low pressures, where the neutral gas
