JOE BIDEN has won the US election yet faces an even tougher battle in office as the Republicans look tipped to block the Democrat's every move, a political expert told Express.co.uk.

Authority, Ascendancy, and Supremacy examines the American, Chinese, and Russian (Big 3) competition for power and influence in the Post-Cold War Era. With the ascension of regional powers such as India, Iran, Brazil, and Turkey, the Big 3 dynamic is an evolving one, which cannot be ignored because of its effect to not only reshape regional security, but also control influence and power in world affairs. How does one define a "global" or "regional" power in the Post-Cold War Era? How does the relationships among the Big 3 influence regional actors? Gregory O. Hall utilizes country data from primary and secondary sources to reveal that since the early 1990s, competition for influence and power among the Big 3 has intensified and could result in armed confrontation among the major powers. He assesses the state of affairs in each country's economic, resource, military, social/demographic, and political spheres. In addition, events data, which focuses on international interactions, facilitates identifying trends in Big 3 interactions as well as their concerns and affairs with regional players. Opinion data, drawn from policy makers, scholarly interviews, and survey research data, identifies foreign policy interests among the Big 3, as well non-Big 3 foreign policy behaviors. With its singular focus on American, Chinese, and Russian interactions, policy interests, and behaviors, Authority, Ascendancy, and Supremacy represents a significant contribution for understanding and managing Post-Cold War conflicts and promises to be an important book.

This is not a conventional book. It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it. It does this by suggesting questions and lines of questioning on a wide range of topics. The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal. To this end, almost all questions have a list of books or articles to provide a starter for stimulating further reading. Once you start, you will be hooked! Never stop questioning.

This work seeks to develop a new concept with which to analyse the actions and activities of states that tend to be relatively ignored by the discipline of International Relations (IR). As a discipline, IR has a tendency to lean towards the analytically safe. Given the current and recent dynamism of the international system that is both surprising and undesirable. Arranged around the concept of the Cusp State (and cuspness more generally), the book consists of empirical analysis of eight different countries Brazil, Iran, Israel, Japan, Mexico, Taiwan, Turkey and Ukraine, defined as 'states that lie uneasily on the political and/or normative edge of what is widely believed to be an established region'. By focusing on the importance of comparing groups of states, like states with high degrees of 'cuspness', this book argues that it is possible to categorise the world in a fresher and more original way, and one which covers more of the globe than either a systemic or regionalist approach would do. This work will be of great interest to students and scholars of Geopolitics, International Security and Regionalism.

As Africa's strategic importance has increased over the past decade and a half, United States security cooperation with the continent has expanded. The most visible dimension of this increased engagement was the establishment of the U.S. Military Command for Africa (AFRICOM). Some critics are skeptical of AFRICOM's purpose and see the militarization of U.S. Africa policy while others question its effectiveness. Recognizing the link between development and security, AFRICOM represents a departure from the traditional organization of military commands because of its holistic approach and the involvement of the Department of State as well as other U.S. government stakeholders. Nevertheless, AFRICOM's effort to combine security and development faces formidable conceptual and operational challenges in trying to ensure both American and African security interests. The human security perspective's emphasis on issues that go beyond traditional state-centered security to include protecting individuals from threats of hunger, disease, crime, environmental degradation, and political repression as well as focusing on social and economic justice is an important component of security policy. At the same time, the threat of violent extremism heavily influences U.S. security cooperation with Africa. In this examination of the context of U.S.-African security relations, Robert J. Griffiths outlines the nature of the African state, traces the contours of African conflict, surveys the post-independence history of U.S. involvement on the continent, and discusses policy organization and implementation and the impact of U.S. experiences in Iraq and Afghanistan on the U.S.-Africa security relationship. Africa's continuing geostrategic significance, the influence of China and other emerging markets in the region, and America's other global engagements, especially in light of U.S. fiscal realities, demonstrate the complexity of U.S.-African security cooperation.

Numerous scholars have noticed that certain political institutions, including federalism, majoritarian electoral systems, and presidentialism, are linked to lower levels of income redistribution. This book offers a political geography explanation for those observed patterns. Each of these institutions is strongly shaped by geography and provides incentives for politicians to target their appeals and government resources to localities. Territorialized institutions also shape citizens' preferences in ways that can undermine the national coalition in favor of redistribution. Moreover, territorial institutions increase the number of veto points in which anti-redistributive actors can constrain reform efforts. These theoretical connections between the politics of place and redistributive outcomes are explored in theory, empirical analysis, and case studies of the USA, Germany, and Argentina.

How effective are democracy clauses of regional integration organizations (RIOs) in promoting democratization and democratic consolidation among member-states? RIOs are increasingly adopting "democracy only" clauses in their treaties, requiring democracy and political stability as a condition of membership. Stable democracy is a collective good for RIO members; without political stability, uncertainty regarding economic exchange increases, undermining the promise of integration. The presence of powerful countries may be necessary for the RIOs to legalize democratic conditionality. In this book, the authors argue that once established democracy clauses exert an independent influence in promoting and defending democratic norms and institutions within the member-states by increasing the transparency and credibility of democratic commitment and sanctions for violation. The findings based on the analysis of 40 RIOs around the world and in-depth analysis of the European Union, the Common Market of the South, and the Economic Community of West African States indicate that RIO democracy clauses help prevent democratic backsliding and coups and stimulate democratization and consolidation. With its global scope, originality, and theoretical rigor, this is the first book to catalogue democracy clauses adopted by RIOs worldwide with a thorough analysis of their effectiveness.

Conflict economies cannot be approached in isolation but must instead be contextualised socially and historically. These economies did not emerge in vacuum, but are part and parcel of the history of people and place. This book explores the informal and illicit extraction and trade of minerals and other types of natural resources that takes place in the 'borderlands' during periods of conflict. This type of extraction and marketing, often referred to as 'conflict trade' depends on a weak state, and works alongside the structures of the state and its officials. The book emphasises that conflicts do not start as competition over natural resources and in turn suggests that the integration of the extraction and marketing of natural resources only starts once fighting is well under way. Boss argues that although economic agendas are an integral part of African conflicts, the desire to accumulate is not the only motivation. Thus, in order to present a more comprehensive analysis of conflict we need to take into account political, cultural, and historical factors, in addition to the economic dimensions of conflict. This book will be of very strong interest to students and scholars of political economy, conflict studies, international relations and development.

The extractive sector is a particular area of expertise for Canada and more than half of Canada's mining assets abroad are located in Latin America, specifically in Brazil, Peru, Chile, and Colombia. The Canada-Colombia accord was the first free-trade agreement in the world to include annual Human Rights Impact Assessments (HRIA), and also includes a labour side accord where abuse complaints can be formally registered. Using Colombia as a case study, James Rochlin and his international and multidisciplinary line up of Canadian and Colombian scholars, and activists working in the area of human rights, and the judiciary explore: What is the best way to identify and operationalize for mutual benefit the concentric space between the interests of extractive corporations in profit and security, on the one hand, and the interests of the host communities in the promotion of human rights and human security, on the other? What can the four emblematic and diverse cases in Colombia (Meta, Serpovia, Marmato, and Bolivar/La Guajira) tell us about how to fine tune and improve a newly implemented governmental HRIA to render it an increasingly useful global instrument to promote simultaneously corporate security and human security for host communities? What is the most efficient and effective way to design and implement Corporate Social Responsibility Programs in a manner that promotes simultaneously corporate security and community human security? Written in a clear and accessible style, Profits, Security, and Human Rights presents practical lessons on how to promote both corporate security and human security in communities where the extractive sector operates in the Global South.

Turkey's relations with the European Union is one of the most enigmatic topics in the European Studies literature. This country, kept at bay by Europeans for centuries, once came unexpectedly close to full-membership. The progress Turkey recorded in its European quest is difficult to account for with either Turkey's performance or the positive attitude of the Europeans towards Turkey. In this book, Armağan Emre Çakır chronicles over six decades of US involvement in EU-Turkey relations. Shedding new light on the reasons, characteristics, transformation and relative importance of the US influence on Turkey-EU relations, he argues that Turkey's quest for EU membership would not have advanced this far without the support from the United States. Çakır's hypotheses and findings are grounded in original research that, among other things, includes interviews conducted on both sides of the Atlantic with key players, archival material and newspaper articles. The valuable insights presented in this book make for a much needed alternative history of this volatile relationship.
