enter wholeheartedly into the serious pursuit of thinking.... "Heidegger is not a 'primitive' or a 'romantic.' He is not one who seeks escape from the burdens and responsibilities of contemporary life into serenity, either through the re-creating of some idyllic past or through the exalting of some simple experience. Finally, Heidegger is not a foe of technology and science. He neither disdains nor rejects them as though they were only destructive of human life. "The roots of Heidegger's thinking lie deep in the Western philosophical tradition. Yet that thinking is unique in many of its aspects, in its language, and in its literary expression. In the development of this thought Heidegger has been taught chiefly by the Greeks, by German idealism, by phenomenology, and by the scholastic theological tradition. In him these and other elements have been fused by his genius of sensitivity and

intellect into a very individual philosophical expression." --William Lovitt, from the Introduction

Essential reading for students and anyone interested in the great philosophers, this book opened up appreciation of Martin Heidegger beyond the confines of philosophy to the reaches of poetry. In Heidegger's thinking, poetry is not a mere amusement or form of culture but a force that opens up the realm of truth and brings man to the measure of his being and his world.

Critiques the predominant romantic ideal.

In *Being and Time* Heidegger gives an account of the distinctive features of human existence, in an attempt to answer the question of the meaning of being. He finds that underlying all of these features

is what he calls 'original time'. In this clear and straightforward introduction to the text, Paul Gerner takes the reader through the work, examining its detail and explaining the sometimes difficult language which Heidegger uses. The topics which he covers include being-in-the-world, being-with, thrownness and projection, truth, authenticity, time and being, and historicity. His book makes Being and Time accessible to students in a way that conveys the essence of Heidegger's project and remains true to what is distinctive about his thinking.
