citizenship / urban governance / water infrastructure I. IntroDuCtion In rapidly transforming cities of the global South, low-income populations reside " beyond the networks ", in terms of service provision. Previous studies have established the inadequacies of state provision of water and sanitation infrastructure in meeting the internationally

Beyond the networked city: situated practices of ...
The main development emergent from the chapters is a shift from the post-network city hypothesis to what is encapsulated by the book ' s title: ' beyond the networked city ' . ' Shifting forms of infrastructure never consist of big, paradigm-busting transitions from one large technical network to another ' (p. 6), observe the editors.
