Messier employs the audit approach currently being used by auditing professionals. This approach is a direct result of the demands of Sarbanes-Oxley, which has changed the way auditors do their jobs. The approach emphasizes understanding the entity (i.e., the organization or business being audited) and its environment (i.e. industry), and then assessing the business risks faced by the entity and how management controls those risks. This audit process focuses on business processes instead of accounting cycles. This unique and innovative approach has been developed in response to changing market dynamics. The systematic approach, referred to in the subtitle of

the text, reflects the early introduction of three basic concepts that underlie the audit process: materiality, audit risk, and evidence; this allows Messier to build upon this model in subsequent chapters. These are central to everything an auditor does and a unique feature of Messier. As such, this approach helps students develop auditor judgment, a vital skill in today's auditing environment.

Auditing & Assurance Services, First South African Edition, combines a genuine international perspective with South African examples and coverage of the landmark changes within the South African auditing environment. Key features include: South African

content - The authors weave regionally specific content and examples throughout the text and cover the changes to the regulatory and corporate governance environment in South Africa. International perspective - Professional practice and regulation all over the world is driven by international events and initiatives. The clarified ISAs are fully integrated into the chapters with international real-world cases used to illustrate concepts and application. Systematic approach - The text gives students a deep understanding and working knowledge of fundamental auditing concepts and how they are applied. The core foundation of the text and its focus on critical judgements and decision-making processes
