Canon fax machines manufactured since 2003 use a fax-image compression type named "Super G3." Essentially, super G3 allows for fax transmissions to be compressed while being transmitted allowing for faster speed while faxing. This increased speed engages the phone line for a shorter period of time, which lowers the expense of faxing; when you send a fax from a business line designated as a fax line, the longer the line is engaged, the more expensive it is.

Now available in two versions rather than three, this introduction to computers book is one that users will engage with – maintaining the encyclopedic approach in the popular magazine style. It is refreshing, accurate, and easy to learn from-written to today's reader. The Eighth Edition moves the emphasis to connectivity and includes loads of new research to ensure that the statistics in the book are current. This edition emphasizes emerging technologies while de-emphasizing older technologies. The Complete version is chapters 10-14 of the Introductory version (with one Spotlight at the end on Emerging Technologies). Covers Careers and Certification, Programming, Databases and Information Systems, Systems Analysis and Design, and Enterprise Computing. For anyone wanting a basic knowledge of computers to apply to their jobs or lives.
