This classic novel, sometimes attributed to one "James Jennings," was published by Olympia in the firm's later incarnations. Eveline: is 18, beautiful, aristocratic, intelligent, and uppermost in the minds of male admirers. This young student sweeps readers along in her tales of erotic pleasure with the lascivious Major General, the prodigiously endowed stable-hand, and the splendid but stern Inspector General. This tale of a girl's sexual rites of passage is audacious, surprising, and blazingly erotic-- as one review puts it, though that's hardly the whole story. The Major-General is a blood relative, as are other objects of Eveline's hardy-innocent affections.

If the clothes make the man, then Father Michael Montebello is a complicated figure indeed. Though torn over his decision, he trades in his priestly robes for camouflage and the boots of a soldier. But the killing isn't occurring just on the battlefield. As Michael leaves his church, people are mysteriously dying at the hands of a young woman named Urania. Just what motivates this woman, however, is a mystery. Meanwhile, Michael finds himself clutching his rosary beads amid a war. Four days after being wounded in battle, he wakes up in a hospital having barely survived his ordeal. When he returns to his church, he finds that it is lying in ruins and a seemingly evil man has taken over both his house and parish. Desperate to atone for the sins that were committed in his absence, Michael becomes a policeman, and Urania continues to kill. The two eventually meet, and then Michael is led to an island set against the beautiful Atlantic Ocean where he journeys through a wide range of human emotions in There He Was, Gone.

Women in Love follows lives of the Brangwen sisters, Ursula a schoolteacher, and Gudrun a painter. They meet two men who live nearby, school inspector Rupert Birkin and Gerald Crich, heir to a coal-mine, and the four become friends. Ursula and Birkin begin a romantic friendship, while Gudrun and Gerald eventually begin a love affair. The emotional relationships thus established are given further depth and tension by an intense psychological and physical attraction between Gerald and Rupert. All four are deeply concerned with questions of society, politics, and the relationship between men and women. The novel ranges over the whole of British society before the time of the First World War and eventually concludes in the snows of the Tyrolean Alps.

Internet research spans many disciplines. From the computer or information sciences, through engineering, and to social sciences, humanities and the arts, almost all of our disciplines have made contributions to internet research, whether in the effort to understand the effect of the internet on their area of study, or to investigate the social and political changes related to the internet, or to design and develop software and hardware for the network. The possibility and extent of contributions of internet research vary across disciplines, as do the purposes, methods, and outcomes. Even the epistemological underpinnings differ widely. The internet, then, does not have a discipline of study for itself: It is a field for research (Baym, 2005), an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other. There are, of course, some inhibitions that limit explorations in this field: research ethics, disciplinary conventions, local and national norms, customs, laws, borders, and so on. Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet. After nearly two decades of research and scholarship, the limits are a positive contribution, providing bases for discussion and interrogation of the contexts of our research, making internet research better for all. These "limits," challenges that constrain the theoretically limitless space for internet research, create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation.
