Modern optimization approaches have attracted an increasing number of scientists, decision makers, and researchers. As new issues in this field emerge, different optimization methodologies must be developed and implemented. The Handbook of Research on Emergent Applications of Optimization Algorithms is an authoritative reference source for the latest scholarly research on modern optimization techniques for solving complex problems of global optimization and their applications in economics and engineering. Featuring coverage on a broad range of topics and

perspectives such as hybrid systems, non-cooperative games, and cryptography, this publication is ideally designed for students, researchers, and engineers interested in emerging developments in optimization algorithms.

To succeed in achieving its national security objectives the United States needs to use Associative Power in place of both Hard Power and Soft Power. Associative Power is the use of joint ventures and alliances to optimize the forms of power brought to bear in conflicts responding with precision to a spectrum of enemy threats,

situational challenges, and political opportunities. Associative Power was wisely and successfully used by the United States in the Vietnam War through the CORDS program of counter insurgency and village development to defeat the Viet Cong insurgency and permit the withdrawal of American combat forces. Associative power was not used by the United States—nor was the best counter insurgency practices of CORDS—in the Iraq and Afghanistan conflicts. As a result of this omission, interim outcomes in Iraq and Afghanistan did not acceptably accomplish

gamification, the use of game design elements in non-game contexts, specifically as an organization and management research problem. As we travel deeper into the twenty-first century, it is becoming increasingly clear the late modernity is redefining its take on games and play. Following what has been termed a general ludification or playification of society, corporations are beginning to see games and play as resources rather than as a wasteful practice. We are witnessing the emergence of the practice of gamification with the intention of mobilizing

play's motivational power for capitalist production. This book outlines both the essential "how tos" and also critically explores their links to diverse strands of organization theory such as institutionalism, business ethics, critical theory and organizational behavior. Gamification research has been mostly conducted within disciplines such as information studies, game studies and information systems science. This is a paradoxical state of affairs; whilst gamification aims at being a transformative intervention in work processes and practices and is being

deployed as such by practitioners. This book will be of value to researchers, academics and students interested in management and organization studies.

A lot of people wonder how Chinese parents raise such stereotypically successful kids. They wonder what Chinese parents do to produce so many math whizzes and music prodigies, what it's like inside the family, and whether they could do it too. Well, I can tell them, because I've done it... Amy Chua's daughters, Sophia and

Louisa (Lulu) were polite, interesting and helpful, they had perfect school marks and exceptional musical abilities. The Chinese-parenting model certainly seemed to produce results. But what happens when you do not tolerate disobedience and are confronted by a screaming child who would sooner freeze outside in the cold than be forced to play the piano? Battle Hymn of the Tiger Mother is a story about a mother, two daughters, and two dogs. It was supposed to be a story of how Chinese parents are better at raising kids than Western ones. But instead,
