In the early years of the 21 st century the criminal justice system once again finds itself a useful tool in the control of a new type of dangerous class illegal aliens and terrorists. In the case of the former, we have the furor over the huge influx of people from mostly Mexico coming across the border to fill hundreds of thousands of low wage jobs.

Throughout history, the powerful have created laws, developed agencies to enforce those laws, and established institutions to punish lawbreakers. Maintaining the social order to their advantage resulted in the systematic repression of disadvantaged groups—the “dangerous classes.” The third edition retains a historical approach to exploring patterns of social control and, through current examples, demonstrates how those strategies continue today. The authors trace the roots of

race, class, and gender bias in how laws are written, interpreted, and applied. The management of dangerous classes is not a recent phenomenon; there is a long history of keeping those who derive the least advantage from the status quo (and therefore pose the greatest threat) under control. There was and is one system of justice for the privileged and a very different system for the less privileged. The criminal justice system—from the law to daily operations of the police, courts, and corrections—generally comes down hardest on those with the least amount of power and influence and is the most lenient with those with the most power and influence. The book raises critical questions. What is a crime? What is law? Whose interests are served by the law and the criminal justice system? What patterns are repeated generation after generation? How does the criminal justice system relate to larger issues such as social inequality, social class, race, and gender? Contemplation of these topics contributes to informed public dialogue and careful deliberation about the present state and the future of criminal justice.

This text covers the history of criminal justice from a critical perspective and explores the historical biases of the criminal justice system. The overall theme of this book is that both the making of laws and the interpretation and application of these laws throughout the

Christie argues that crime control, rather than crime itself, is the real danger for our future. He documents the forces driving the prison industry in Europe and the United States, offering an explanation of increased incarceration rates in the 1980s and 1990s. The growing use of prisons has paralleled two important social changes, both with a

potential for unrest : the increasingly unequal distribution of wealth, and restriction of access to well-paid work. Instead of attempting to deal with these problems through positive social changes, developed countries have called on the crime control industry to deal with the consequences. The desire for security, stability, and predictability among the more affluent elements of society has fuelled the willingness of politicians and policymakers to make huge investments in the crime control industry, particularly its most costly feature, prisons and jails. The book shows how trends in the use of imprisonment have risen and fallen over time, and it traces this to underlying societal values as to what is right and fair in the treatment of other human beings. It is finally such values that will determine the limits societies will choose to impose on the crime control industry. Thoughts, values, and ethics, not the drive for profit, must ultimately determine the limits of control.

This comprehensive survey of the literature on gangs and gang activities in America includes theoretical perspectives on why gangs exist, gang typologies, descriptions of gang activities, and various intervention strategies for dealing with gangs. This research provides a historical and cross-cultural exploration of the relations between the criminal justice system and the dangerous classes. The concept of the dangerous classes is discussed and utilized to illustrate how and why different groups in society were labeled as dangerous and given special attention by law enforcement agencies. This paper is based on the qualitative methodology of unobtrusive research and draws its data from content analysis of documents of governmental agencies, scholarly literature, press publications, and observations of the actual participants and witnesses. Research findings support the idea that both Russia and the United States used the criminal justice system to control population groups that posed a threat to the existing economic relations, challenged dominant ideology, or were excluded from the participation in the wage-labor relations.
