The Cost of Receiving should trend lower over time. Receiving Efficiency (or Productivity): Volume of goods received per warehouse operator per hour. Formula: Volume/Total labor hours. Interpretation: Higher scores show a more efficient receiving operation while lower scores shows potential problems with receiving that should be investigated. Receiving Efficiency should trend higher over time.

Institutional Reform of Air Navigation Service Providers deals with the changes that have taken place in this major, technologically progressive industry as many countries moved away from direct provision by the government to forms of corporate or private provision. The author provides an up-to-date institutional and economic analysis of air navigation service providers' efforts to reform their governance and funding structures under these changes. The book discusses air navigation service providers in great detail, with a focus on the historical evolution of the industry's institutional and regulatory frameworks as well as the ongoing developments in the industry (e.g. the Single European Sky in Europe and NextGen in the US). The author departs from the more conventional quasi-descriptive analysis by performing economic and econometric analyses of the industry that explicitly include institutional variables, e.g. to explore whether the nature of ownership can be associated with different economic efficiency outcomes. The result is a rigorous assessment of the structures of various air navigation service providers, strengthened by the use of case studies and policy analysis of potential reform. The theme and scope of this book will appeal to anyone interested in the institutional and regulatory history of air navigation

Projects are often more complex and stressful than they need to be. Far too many of them fail to meet expectations. There are far too many conflicts. There are too few moments of joy and too much anxiety. But there is hope. It is possible to remove the unnecessary stress and complexity. This book is about how to do just that. It links the essential principles and techniques of managing projects to a "wisdom" approach for working with complex, people-based activities. Project management becomes a metaphor for how we can live our lives and, if we follow the wisdom traditions, the way we live our lives becomes a metaphor for how to manage projects. The book guides readers in exploring how to: .Remove unnecessary stress and complexity from your projects .Apply mindfulness and open mindedness to cut through the barriers to personal self-actualization .Manage expectations to ensure that people get what they need, when they need it and for the cost they expected to pay and that they accept what they get .Manage performance to cut through interpersonal and intrapersonal issues that get in the way of excellence .Break free of self-imposed barriers to creative thinking, conflict resolution and problem solving .Remain calm and energetic while being active and effective in the face of chaos, fear, resistance to change, unrealistic demands, conflict and the other aspects of project life that cause stress
