depreciation

Under this depreciation method, the depreciation for each full year is the same amount. The depreciation expense for a full year when computed under the straight-line method is illustrated here: If a company's accounting year ends on December 31, the company will report the depreciation expense on the company's income statement as shown in the following depreciation schedule:

~~Depreciation | Explanation | AccountingCoach~~

Under the straight-line approach the annual depreciation is calculated by dividing the depreciable base by the service life. To illustrate assume that an

Online Library Depreciation Chapter With Simple Examples In Slideshow

asset has a \$100,000 cost, \$10,000 salvage value, and a four-year life. The following schedule reveals the annual depreciation expense, the resulting accumulated depreciation at the end of each year, and the related calculations.
