Motor Planning: Essential Part of Visual Perceptual System. In Developing Ocular Motor and Visual Perceptual Skills, Kenneth Lane describes the following regarding motor planning: "Motor planning is an integral part of the perceptual motor system and is not a conscious process. The motor plan is formulated according to information stored in memory about the movement.

~~Visual Motor: What are Visual Motor Planning Skills and do~~...

These motor skills allow us to collect visual information and use it in a motor action. Eye-hand coordination requires fine motor dexterity, strength, shoulder stability, core stability, etc. Examples of eye-hand coordination include catching a ball, manipulating pegs into a pegboard, lacing a lacing card, etc. Visual motor skills both require and utilize eye-hand coordination, however the overarching visual motor skills utilize additional components and are a higher level skill.
