Description by Meredith Gailey [+] Even though the poet's texts were at times challenging to set to music, in 1840 Robert Schumann used three of Heine 's poems in his song-cycle Myrthen (Myrtles), two of which were based on flowers, the other on a lone tear. The first of Heine 's poems to appear in the cycle is "Die Lotosblume" ('The Lotus Flower'), which Schumann made into a delicate and sustained tune.

The book prints the words of German poems set to music by Beethoven, Schubert, Schumann, Wagner, Brahms, Wolf, Mahler, and Richard Strauss. In between each line of German text are printed word-for-word literal English translations, and a clear prose translation is also provided for each poem.

Esteemed by many of his most distinguished contemporaries, including Arnold Schoenberg, Alexander Zemlinsky (1871-1942) was a protege of Brahms and Mahler. With centenary celebrations of Zemlinsky's birth, scholars began a careful examination of his works and realized they had discovered a forgotten master. Zemlinsky's wonderful melodic gift was manifested in operas, choral works, chamber music, and symphonic pieces, but was realized most fully in his more than 100 songs. Gorrell explores these songs and uses them as a lens through which to examine this important, highly influential musical figure of the 19th and 20th centuries.

The Pathways of Song series offers concert songs in easy vocal ranges for the voice student, by composers such as Schubert, Brahms, Handel, Bach, Mozart, Beethoven and Haydn. The series includes representative repertoire, with English translations and piano accompaniment.

Focusing on the music of the great song composers--Schubert, Schumann, Brahms, Wolf, and Strauss--Poetry Into Song offers a systematic introduction to the performance and analysis of Lieder . Part I, "The Language of Poetry," provides chapters on the themes and imagery of German Romanticism and the methods of analysis for German Romantic poetry. Part II, "The Language of the Performer," deals with issues of concern to performers: texture, temporality, articulation, and interpretation of notation and unusual rhythm accents and stresses. Part III provides clearly defined analytical procedures for each of four main chapters on harmony and tonality, melody and motive, rhythm and meter, and form. The concluding chapter compares different settings of the same text, and the volume ends with several appendices that offer text translations, over 40 pages of less accessible song scores, a glossary of technical terms, and a substantial bibliography. Directed toward students in both voice and theory, and toward all singers, the authors establish a framework for the analysis of song based on a process of performing, listening, and analyzing, designed to give the reader a new understanding of the reciprocal interaction between performance and analysis. Emphasizing the masterworks, the book features numerous poetic texts, as well as a core repertory of songs. Examples throughout the text demonstrate points, while end of chapter questions reinforce concepts and provide opportunities for directed analysis. While there are a variety of books on Lieder and on German Romantic poetry, none combines performance, musical analysis, textual analysis, and the interrelation between poetry and music in the systematic, thorough way of Poetry Into Song.
