This article discusses how international businesses are affected by the rise of the emerging markets especially the BRICS (Brazil, Russia, India, China, and South Africa) and the next "Breakout Nations" from the second tier of the emerging markets. The point to note is that ever since the emerging markets opened up their economies and liberalized their procedures, international businesses have found a readymade market for themselves in which they can operate in, make, and sell goods.

Emerging Markets and International Business

Emerging Trends in International Finance. International finance is that branch of financial economics that deals with the monetary or the macroeconomic inter relations between two or more nation states. This field studies the relationships and dynamics that exist in the global financial systems or the international monetary system such as balance of payments, stock exchanges, exchange rates, foreign direct investment as well as international trade.
