Energy Flow Webquest - Honors Biology

Energy moves life. The cycle of energy is based on the flow of energy through different trophic levels in an ecosystem. Our ecosystem is maintained by the cycling energy and nutrients obtained from different external sources. At the first trophic level, primary producers use solar energy to produce organic material through photosynthesis.

Energy Flow in Ecosystem - Tutorialspoint

Not all of the energy an organism has is passed on to its predator because it uses up some of the energy for its own life processes. Therefore, there are less organisms and also less energy as you go up the energy pyramid.

Interdependence helps to maintain balance within an
