computational systems biology. 4. Basics. • Enzyme kinetics studies the reaction rates of  
enzyme-catalyzed reactions and how the rates are affected by changes in experimental  
conditions • An essential feature of enzyme-catalyzed reactions is saturation: at increasing  
concentrations of substrates the rate increases and approaches a limit where there is no  
dependence of rate on concentration (see slide with limiting rate  $V_{max}$ ) • Leonor Michaelis and  
Maud Menten were among the first ...
