This book takes a fresh look at programs  
for advanced studies for high school  
students in the United States, with a  
particular focus on the Advanced  
Placement and the International  
Baccalaureate programs, and asks how  
advanced studies can be significantly  
improved in general. It also examines two  
of the core issues surrounding these  
programs: they can have a profound  
impact on other components of the  
education system and participation in the

programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

The author asserts that the fate of philosophy is something altogether different from the so-called history of philosophy. The exemplary territory of the history of philosophy is pure language, set back from the living experience of speechless things and speechless nonhumaness, whereas the fate of philosophy is related to the

This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in

achieving affordable and sustainable TLM provision for all students. This study, which draws from more than 40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

All pathology residents must have a good command of clinical chemistry, toxicology, immunology, and laboratory statistics to be successful pathologists, as well as to pass the American Board of Pathology examination. Clinical chemistry, however, is a topic in which many senior medical students and pathology residents face challenges. Clinical Chemistry, Immunology and

Laboratory Quality Control meets this challenge head on with a clear and easy-to-read presentation of core topics and detailed case studies that illustrate the application of clinical chemistry knowledge to everyday patient care. This basic primer offers practical examples of how things function in the pathology clinic as well as useful lists, sample questions, and a bullet-point format ideal for quick pre-Board review. While larger textbooks in clinical chemistry provide highly detailed information regarding instrumentation and statistics, this may be too much information for students, residents, and clinicians. This book is designed to educate senior medical students, residents, and fellows, and to "refresh" the knowledge base of practicing clinicians on how tests are performed in their laboratories (i.e., method principles, interferences, and limitations). Takes a

practical and easy-to-read approach to understanding clinical chemistry and toxicology Covers all important clinical information found in larger textbooks in a more succinct and easy-to-understand manner Covers essential concepts in instrumentation and statistics in such a way that fellows and clinicians understand the methods without having to become specialists in the field Includes chapters on drug-herb interaction and pharmacogenomics, topics not covered by textbooks in the field of clinical chemistry or laboratory medicine

Book For Grade 10 provides an important opportunity for students to learn the core concepts of physics and understand how those concepts apply to their lives and to the world around them. Due to the comprehensive nature of the material, we are offering the book in three volumes for flexibility and efficiency. Coverage and Scope Our University Physics textbook adheres to the scope and sequence of most two- and three-semester physics courses nationwide. We have worked to make physics interesting and accessible to students while maintaining the mathematical rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from fundamental to more advanced concepts, building upon what students have already learned and emphasizing connections between topics and between

The organization and pedagogical features were developed and vetted with feedback from science educators dedicated to the project.

light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

Ethiopia is facing environmental and poverty challenges, and urgently needs effective management of its environmental resources. Much of the Ethiopian landscape has been significantly altered and reshaped by centuries of human activities, and three-quarters of the rural population is living on degraded land. Over the past two decades the country has seen rapid economic and population growth and unparalleled land use change. This book explores the challenges of sustaining the resource base while fuelling the economy and providing for a growing population that is greatly dependent on natural resources for income and livelihoods. Adopting a political ecology perspective, this book comprehensively examines human impacts on the environment in Ethiopia, defining the environment both in terms of the quantity

and quality of renewable and non-renewable natural resources. With high levels of economic production and consumption also come unintended side effects: waste discharges, emissions of pollutants, and industrial effluents. These pollutants can degrade the quality of water, air, land, and forests as well as harm the health of people, animals, and other living organisms if untreated or disposed of improperly. This book demonstrates how the relationship between society and environment is inherently and delicately interwoven, providing an account of Ethiopia's current environment and natural resource base and future considerations for environmentally sustainable development.

conversations. It describes the study of overlapping or intersecting social identities such as race, gender, ethnicity, nationality, and sexual orientation alongside related systems of oppression, domination, and discrimination. Together, these frameworks are used to understand how systematic injustice or social inequality occurs. In this book, Roland Betancourt examines the presence of marginalized identities and intersectionality in the medieval era. He reveals the fascinating, little-examined conversations in medieval thought and visual culture around matters of sexual and reproductive consent, bullying, non-monogamous marriages, homosocial and homoerotic relationships, trans and non-binary gender identifications, representations of disability, and the oppression of minorities. In contrast to contemporary expectations of the

medieval world, this book looks at these problems from the Byzantine Empire and its neighbors in the eastern mediterranean through sources ranging from late antiquity and early Christianity up to the early modern period. In each of five chapters, Betancourt provides short, carefully scaled narratives used to illuminate nuanced and surprising takes on now-familiar subjects by medieval thinkers and artists. For example, Betancourt examines depictions of sexual consent in images of the Virgin; the origins of sexual shaming and bullying in the story of Empress Theodora; early beginnings of trans history as told in the lives of saints who lived portions of their lives within different genders; and the ways in which medieval authors understood and depicted disabilities. Deeply researched, this is a groundbreaking new look at medieval

This book investigates the role of ethnic federalism in Ethiopian politics, reflecting on a long history of division amongst the country's political elites. The book argues that these patterns have enabled the resilience and survival of authoritarianism in the country, and have led to the failure of democratization. Ethnic conflict in Ethiopia stretches back to the country's imperial history. Competing nationalisms begin to emerge towards the end of the imperial era, but were formalized by the Ethiopian People's Revolutionary Democratic Front (EPRDF) from the 1990s onwards. Under the EPRDF, ethnicity and language classifications formed the main organizing principles for political parties and organizations, and the country's new federal arrangement was also designed along ethnic fault lines. This

book argues that this ethnic federal arrangement, and the continuation of an elite political culture are major factors in explaining the continuation of authoritarianism in Ethiopia. Focusing largely on the last 27 years under the EPRDF and on the political changes of the last few years, but also stretching back to historical narratives of ethnic grievances and division, this book is an important guide to the ethnic politics of Ethiopia and will be of interest to researchers of African politics, authoritarianism and ethnic conflict.
