Expert Systems: Principles and Programming, Third Edition. Joseph C. Giarratano, Gary D. Riley. Gary Riley was, for a long time, a NASA employee whose sole assignment seemed to be to work out the C implementation of the OPS language from LISP to C so that the military could use it. LISP, even the Symbolics LISP machine, was far too slow for practical applications.

blackboard systems and has extended coverage of reasoning.

This volume presents concise and comprehensive coverage of the principles and concepts that are fundamental to the design of expert systems software and hardware and the development of knowledge-based systems. The volume includes an overview of the symbolic and object-oriented programming languages used to create knowledge representation languages structures, a description of declarative and procedural knowledge representation schemes, a discussion of search algorithms and various numerical and non-numerical techniques for dealing with uncertainty, and an introduction to reasoning with one or
