This FAA Advisory Circular includes contributions from the National Weather Service (NWS). This important Federal Aviation Administration Advisory Circular (AC) has been in circulation under a variety of titles for more than 70 years. All pilots and dispatchers must learn to deal with weather: to appreciate good weather, to recognize and respect marginal or hazardous weather, and to avoid violent weather. Recognition of this and sound weather decisions are critical to the successful outcome of all flights. This book discusses each aspect of weather as it relates to aircraft operation and flight safety. The information in Aviation Weather is applicable to students,

Aviation Weather: FAA Advisory Circular (AC) 00-6B (FAA Handbooks series) Advisory Circular Subject: Aviation Weather Date: 8/23/16 AC No: 00-6B Initiated by: AFS-400 Change: This advisory circular (AC) was published by the Federal Aviation Administration (FAA) Flight Standards Service (AFS), with contributions from the National Weather Service (NWS). The publication began in 1943 as CAA Bulletin No. 25, Meteorology for Pilots, which at the time

contained weather knowledge considered essential for most pilots. As aircraft flew farther, faster, and higher, and as meteorological knowledge grew, the bulletin became obsolete. It was revised in 1954 under a new title, The Pilots' Weather Handbook, and updated again in 1965. In 1975 it was revised under its current title. Previous editions have suffered one common problem--they dealt in part with weather services that continually change, in keeping with current techniques and service demands. As a result, each edition was somewhat outdated almost as soon as it was published, its obsolescence growing throughout the period it remained in print. In 1975, in order to alleviate this problem, the authors

completely rewrote the AC. They streamlined it into a clear, concise, readable book, and omitted all reference to specific weather services. This publication is available (Electronic version) in the official website of the FAA. This document is properly formatted and printed as a perfect sized copy 8.5x11".
