The book includes a collection of last 20 years solved questions of General Anatomy including Embryology and Histology, General Human Physiology, Biochemistry, Nutrition and Dietetics, Dental Anatomy, and Oral Histology according to the new syllabus of BDS first year.

QRS for BDS 1st Year is an extremely exam-oriented book. The book contains a collection of the last 10 15 years' solved questions of General Human Anatomy, Embryology and Histology; Human Physiology and Biochemistry; and Dental Anatomy, Embryology and Oral Histology in accordance with the new syllabus of BDS 1st year. The book will serve the requirements of BDS 1st year students to prepare for their examinations and help PG aspirants in quick review of important topics. It would also be helpful for PG students in a quick rush through the preclinical subjects About the Author : - Dr. Jyotsna Rao, is a senior faculty, currently working as an Associate Professor (Reader) in the Department of Oral and Maxillofacial Surgery, The Oxford Dental College, Hospital and Research Centre, Bangalore. She is also the founder and chairperson of Raghasai Institute of Postgraduate Entrance Examinations (RIPEE), Bangalore. Dr Rao has immense experience in teaching undergraduate and postgraduate students. She also keeps herself actively involved in researching innovative and practical ways of coaching the budding professionals for various state and national level postgraduate entrance examinations.

QRS for BDS 1st Year is an extremely exam-oriented book. Now in third edition, the book contains a collection of the last 25 years' solved questions of General Anatomy including embryology and Histology, General Human Physiology and Biochemistry, Nutrition and Dietetics and Dental Anatomy, Embryology and Oral Histology. The book will serve the requirements of BDS 2nd year students to prepare for their examinations and help PG aspirants in quick review of important topics. It would also be helpful for PG students in a quick rush through the preclinical subjects • Each topic begins with outline of the essential facts • Text is followed by more detailed exposition, with special emphasis on clear and simple figures and flowcharts • Presentation of self-explanatory and easy to learn diagrams. • More emphasis on key points, helps to recollect things easily

The book completely covers all the topics included in the curriculum of DADH for dental students. It is the first revision guide in which each topic is presented in the LAQ/SAQ/MCQ format along with the clearly drawn colour diagrams for quick and easy understanding of the subject, long retention of the facts, and familiarizing the student with frequently asked questions asked in the university examinations.

Anatomy for Dental Students, Fourth Edition, demonstrates and explains all the anatomy needed for a modern dentistry undergraduate course. This text covers developmental anatomy, the thorax, the central nervous system, and the head and neck with an emphasis on the practical application of anatomical knowledge. This new edition has been extensively revised and updated in line with contemporary teaching and dental practice. Over 300 new full colour diagrams map all the anatomical regions that dental students need to know, while the lively and accessible text guides the reader's learning. Throughout Clinical Application Boxes demonstrate how the form and function of anatomy have consequences for clinical practice. Side-lines boxes contain additional descriptions for key anatomical structures. This text is supported by an Online Resource Centre with multiple choice questions, drag and drop figure exercises, and links to key resources to help readers to consolidate and extend their knowledge of anatomy. Anatomy for Dental Students brings together anatomical structure, function, and their relationship to clinical practice, making ideal for today's dental students.

This textbook is a comprehensive guide to dental anatomy, physiology and occlusion (alignment), for postgraduate dental students. Beginning with an introduction to anatomy and tooth development, the following chapters provide in depth discussion on deciduous and permanent dentition, morphology of teeth, and occlusion. The final section is dedicated to tooth carving, providing step by step methodology. Each chapter includes multiple choice questions and answers to help students prepare for exams, and features numerous high quality photographs and diagrams with descriptions. Two interactive DVDs are included, demonstrating tooth carving procedures for different teeth, and providing more multiple choice questions for self assessment. Key

points Comprehensive guide to dental anatomy, physiology and occlusion for postgraduate students Complete section dedicated to tooth carving Multiple choice questions in each chapter Includes DVDs demonstrating tooth carving procedures

The third edition of Anand's Human Anatomy for Dental Students is a comprehensive guide to every part of the human anatomy. Beginning with a section on general and systemic anatomy, the book goes on to discuss the head and neck, histology, genetics, embryology and radiological anatomy. Over 1000 illustrations enhance learning and the section on histology includes photographs of slides featuring every tissue and organ, along with a corresponding illustrated diagram. Each section includes review questions to assist revision.

This textbook presents with six sections. The initial part of first section deals with general anatomy, a must for laying foundation of body structure, chapter 4 is "organization of body", gives a comprehensive overview of composition of body, its various parts with essentials of regional anatomy of limbs, thorax and abdomen. Subsequent chapters till chapter no. 17 deals with systemic anatomy, i.e. anatomy of various systems of body with their clinical significance. The section of Head and Neck is extensively covered and has more illustrations. The third section is "histology", it has been.
