All sierra cosworth models used a loom which was separate from the car loom, so it is easy to remove it and use in a different application. The 4x4 L8 differs from the earlier ones in that it is a two part loom with an engine section and a scuttle to ecu section allowing the engine to be removed with its loom still attached.

Ford Sierra Cosworth RS500 models
have been known to fetch six figures
during sale and auction events for
quite some time now. Even dusty barn
finds sell well. For instance, a low-
mileage, one-owner model sold for
£88,000.00 (British pounds), which
equates to nearly \$110,000 U.S.
dollars, at current exchange rates, and
that was back in 2017.

600 Horsepower Is Up For Grabs

Brakes and chassis were upgraded from the standard Sierra setup and despite the extra drag produced by that rear wing, the Sierra RS Cosworth reached a top speed of 149 mph (240 km/h). This Sierra was really a bargain supercar with a price of just under £16000. 5542 built Engine YBB Pinto-based block with Cosworth 16-valve aluminium head

door hatchback, with a 2-litre DOHC turbo engine producing 204 PS (150 kW; 201 hp) and a top speed of 150 mph - a speed normally found only ...

Ford Sierra - Wikipedia

Most of the Cosworth models are now suffering from deteriorating engine bay wiring harnesses. As the harness ages, not only can the connections become a problem, but the resistance of the wire increases, which drastically affects the running of the engine. The replacement harness is constructed from the following components:

Engine wiring harness: Ford Cosworth YB 2wd RHD

Ford used technical feedback from the teams racing the XR4Ti to develop the 1986 Ford Sierra RS Cosworth, which first appeared on race tracks in 1987
