AILET is conducted every year to select eligible candidates for admission to its 5 years integrated course of B.A. LL.B. (Honors).

Criminalistics: Forensic Science, Crime and Terrorism, Second Edition introduces readers with no background in biology or chemistry, to the study of forensic science, crime analysis and application. Principle topics such as fingerprint identification, DNA, paint and glass analysis, drug toxicology, and forensic soil characterization are thoroughly explained in a reader-friendly manner. Unlike other texts available on this topic, this Second Edition is updated to include comprehensive coverage on important homeland security issues including explosives, weapons of mass destruction, and cybercrime. Key Features: * New case studies and updates sections on analysis of fingerprints and questioned documents offer recent developments and findings in this critical field. * Two new chapters on chemistry and biology equip readers with the foundation and tools necessary to understand more advanced topics. * Extensive updating of Chapter 11 "Drug Use and Abuse," provides the latest methods of drug testing and analysis by federal and state law enforcement agencies. Instructor Resources: * Answers to end of chapter questions * Lecture Outlines * Test Bank * PowerPoint Lecture Outlines Student Resources: * Companion Website (secure) featuring: - web links - interactive glossary - interactive flashcards - chapter spotlights - crossword puzzles *Access to the student companion website can be purchased here http://www.jblearning.com/catalog/9780763789947/. Bundles: * Criminalistics with Brown Lab Manual * Criminalistics with Companion Website * Criminalistics with with Brown Lab Manual and Companion Website * Criminalistics with Current Topics in Ethics eChapters

"This textbook presents the forensic methods used to analyze physical evidence along with the scientific principles that are its underpinnings. It is designed for students without a background in science, however students will learn the core principles behind the forensic method which will lead them to be better forensic professionals!"--

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exonerated. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

This project addressed the admissibility of expert evidence in criminal proceedings in England and Wales. Currently, too much expert opinion evidence is admitted without adequate scrutiny because no clear test is being applied to determine whether the evidence is sufficiently reliable to be admitted. Juries may therefore be reaching conclusions on the basis of unreliable evidence, as confirmed by a number of miscarriages of justice in recent years. Following consultation on a discussion paper (LCCP 190, 2009, ISBN 9780118404655) the Commission recommends that there should be a new reliability-based admissibility test for expert evidence in criminal proceedings. The test would not need to be applied routinely or unnecessarily, but it would be applied in appropriate cases and it would result in the exclusion of unreliable expert opinion evidence. Under the test, expert opinion evidence would not be admitted unless it was adjudged to be sufficiently reliable to go before a jury. The draft Criminal Evidence (Experts) Bill published with the report (as Appendix A) sets out the admissibility test and also provides the guidance judges would need when applying the test, setting out the key reasons why an expert's opinion evidence might be unreliable. The Bill also codifies (with slight modifications) the uncontroversial aspects of the present law, so that all the admissibility requirements for expert evidence would be set out in a single Act of Parliament and carry equal authority.

Forensic science has undergone dramatic progress in recent years, including in the areas of DNA collection and analysis and the reconstruction of crime scenes. However, too few professionals are equipped with the knowledge necessary to fully apply the potential of science in civil, criminal, and family legal matters. Featuring contributions from renowned experts in the forensic, scientific, and legal professions, Forensic Science and Law: Investigative Applications in Criminal, Civil, and Family Justice communicates the wide range of methods and approaches used for achieving justice in these circumstances. A solid grounding in the underlying principles of our legal system provides a context for understanding how these methods are applied. The book brings together the words and thoughts of diverse professionals whose common goal is to uncover the truth. About the editors... Cyril H. Wecht, M.D., J.D., is actively involved as a medical-legal and forensic science consultant, author, and lecturer. Currently coroner of Allegheny County (Pittsburgh), Pennsylvania, he is certified by the American Board of Pathology in anatomic, clinical, and forensic pathology and is a Fellow of the College of American Pathologists and the American Society of Clinical Pathologists. Dr. Wecht is a Clinical Professor at the University of Pittsburgh Schools of Medicine, Dental Medicine, and Graduate School of Public Health, an Adjunct Professor at Duquesne University Schools of Law, Pharmacy and Health Services, and a Distinguished Professor at Carlow University. He is a past president of both the American College of Legal Medicine and the American Academy of Forensic Sciences. Dr. Wecht is the author of more than 500 professional publications and has appeared as a guest on numerous national television and radio talk shows. John T. Rago, J.D., is Assistant Professor of Law at Duquesne University School of Law and the Director of both The Cyril H. Wecht Institute of Forensic Science and Law and the Law School's Post-conviction DNA Project. He teaches criminal law and procedure to law students and graduate courses on wrongful convictions, foundations in American law and constitutional criminal procedure to students in the university's Bayer School of Natural and Environmental Sciences. Professor Rago also serves as an appointed member to the Innocence Project's Policy Group of the Cardozo School of Law in New York. He is admitted to practice before the Pennsylvania Supreme Court, the United States Supreme Court, the U.S. Court of Appeals for the Third Circuit and the U.S. District Court for the Western District of Pennsylvania.

Offers information on entrance and degree requirements, expenses and financial aid, programs of study, and faculty research specialties.

Peterson's Graduate Programs in the Physical Sciences contains a wealth of information on colleges and universities that offer graduate work in Astronomy and Astrophysics, Chemistry, Geosciences, Marine Sciences and Oceanography, Meteorology and Atmospheric Sciences, and Physics. The institutions listed include those in the United States, Canada, and abroad that are accredited by U.S. accrediting bodies. Up-to-date information, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the physical sciences program, faculty members and their research, and links to the program or department's Web site. In addition, there are valuable articles on financial assistance and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies.

Peterson's Graduate Programs in the Biological Sciences 2012 contains a wealth of information on accredited institutions offering graduate degree programs in these fields. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. There are also valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.
