Freud discussed this model in the 1920 essay “ Beyond the Pleasure Principle ” , and elaborated upon it in the “ The Ego and the Id ” (1923). The Id: According to Freud the id is the completely unconscious, impulsive and demanding part of the psyche that as a child allows us to get our basic needs met. This part of the psyche operates on what Freud termed the pleasure principle and it ' s all about getting our every need and wish met with no consideration of the reality.

A year after the outbreak of the First World War, at the age of sixty, Freud gave his ' Introductory Lectures on Psychoanalysis ' at the University of Vienna. In them he outlined the key tenets of psychoanalytic theory, as he had developed them over the past two decades, including his ideas of repression, free association and libido.

Sigmund Freud | Institute of Psychoanalysis

The psychodynamic theory is a psychological theory Sigmund Freud (1856-1939) and his later followers applied to explain the origins of human behavior. The psychodynamic approach includes all the theories in psychology that see human functioning based upon the interaction of drives and forces within the person, particularly unconscious, and between the different structures of the personality.
