Fundamentals of Corporate Finance (Mcgraw-hill/Irwin

...)

The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application.

FCF was written with one strongly held principle in mind: Corporate Finance should be developed in terms of a few integrated, powerful ideas. RWJ took a hard look at what was truly important and useful; in doing so, they eliminated topics of dubious relevance, downplayed purely theoretical issues, and minimized the use of extensive and elaborate calculations to illustrate

Finance (FCF) has three basic themes that are the central focus of the book:

- 1) An emphasis on intuition-the authors separate and explain the principles at work on a common sense, intuitive level before launching into any specifics.
- 2) A unified valuation approach-net present value (NPV) is treated as the basic concept underlying corporate finance.
- 3) A managerial focus-the authors emphasize the role of the financial manager as decision maker, and they stress the need for managerial input and judgment.
