The curriculum of elementary schools is a very important factor in the education of children. Students need to understand and express themselves in a language which can be the Mother Tongue only at the elementary level. Curriculum development is an important part of the education process, ensuring that classes at all levels, from early childhood to post-secondary, are best designed to help students be successful in learning the material and gaining the skills needed to continue to advance. Evaluation essentially is the provision of information for the sake of facilitating decision making at various stages of curriculum development. This information may pertain to the program as a complete entity or only to some of its components. Evaluation also implies the selection of criteria, collection and analysis of data. It includes obtaining information for use in judging the worth of a programme and procedure. It is a comprehensive term and transcends standardized tests covering all means of ascertaining the results of construction. A curriculum framework is an organized plan or set of standards or learning outcomes that defines the content to be learned in terms of clear, definable standards of what the student should know and be able to do. The supporters of learner-centered Curriculum give importance to individual development and they wants to organize the curriculum according to the needs and interest of learners, there are fundamental differences in this approach and the subject-centered design. The curriculum framers for elementary schools should also associate the parents and specialists while developing the curriculum for elementary education.
