Clarifying the New ISO Contamination Filtration
Standards. Mike Day, Pall Corporation. The ISO
Technical Committees responsible for fluid power
(ISO/TC131/SC6) have recently introduced new
standards for the measurement and assessment of fluid
cleanliness (Table 1). While primarily developed for
fluid power, the new standards are equally applicable to
the lubricating oil sector.

There are many standards for HEPA filters. Intended to provide clarity in this maze of standards, ISO 29463 is derived from EN 1822, which defines the EPA, HEPA and ULPA filter classes commonly found in industrial use. ISO 29463 maintains the filter designations EPA, HEPA and ULPA while replacing filter classes E10-E12, H13-H14 and U15-U17 with the following 13 filter classes:

Are you confused about NEW HEPA filter standards ... Contaminant Reduction Claims Guide. At NSF, we certify a wide variety of purification systems designed to reduce many different kinds of contaminants. To help you find the best water filter for you, we have these lists of certified products based on the contaminants we get the most enquires about. Keep in mind that if a filter type is not listed, it is likely that there are no systems of that type certified to reduce that specific contaminant.

Contaminant Reduction Claims Guide | NSF International

Critical contamination situations demonstrate the importance of dispenser filtration. By trapping particulate and other contaminants, and by slowing the flow of fuel to alert operators to the presence of phase separation, dispenser filters are the last line of defense against the distribution of contaminated fuel.

contamination control technology. For their development, the following general guidance principles have been agreed: - The series of standards to be developed shall address only subjects of general applicability to all cleanroom usage areas.

The ISO contamination control standards - HVDS | Air Filters

NSF International external icon is an independent organization that develops public health standards for products. One way to figure out what a water filter does is to look for an NSF certification on the label. You can look up specific products in the NSF database external icon online to see what they are certified to protect against. Some of the NSF standards applicable to water treatments are standard 41 (taste and odor), 53 (cyst reduction), 58 (reverse osmosis), and 62 (distillation).

Choosing Home Water Filters & Other Water Treatment ...

Cross contamination . Cross contamination is the spread of bacteria around your kitchen, from food to surfaces and from surfaces to food and can be a major cause of food poisoning. There are stages to be aware of cross-contaminating food, for example when preparing and storing food.
