Welcome everyone to your guide to Human Anatomy & Physiology! This book covers the following topics: body organization and terminology, chemistry of the body, cell anatomy and physiology, tissues, integumentary system, skeletal system, muscular system, nervous system, brain, spinal cord, sympathetic and parasympathetic nervous system, and senses. I have been teaching college level human anatomy and physiology for many years, as well as other courses. My other classes taught have included: pathophysiology, biology, zoology, microbiology, and others. I have learned through the years the best ways to learn the most information in the least amount of time. This guide will give you the important information from the chapters, which will be what you are most likely to see on an exam. Sample questions will be included, which are also the most likely for you to see on an exam. Note also that this book is not a guide for A&P lab. This book will cover the topics needed for the first half of a two semester college level Human Anatomy & Physiology course.
