Annual Mooring Inspection Service. Moorings are required by insurance companies and NSW Roads and Maritime to be inspected on a annual basis. As most of the wear occurs at the sea bed the only effective way is to have a mooring contractor lift and inspect your mooring. The results of our moorings repairs can sometimes only be determined by the condition of the mooring when we locate it.

Annual Mooring Inspection | GP Marine

The greatest value of in-service inspection is in finding unexpected degradation or damage, normally due to previously unexpected mechanisms (e.g., microbial action, excessive wear at the touchdown point [the thrash zone], interaction between different material types, out-of-plane bending of chain).

Full Description API Recommended Practice (RP) 2I provides guidelines for inspecting mooring components of Mobile Offshore Drilling Units (MODUs) and permanent floating installations. It is an extension of the second edition, which addressed in-service inspection of mooring components for MODUs only. Major changes in this edition include:

API RP 2I (R2015)

Lay and maintain a Private Swinging Mooring Privately Licensed Moorings can only be obtained through PHC. They are charged for and reissued annually, conditional of an Annual Service Inspection being completed. Private Mooring Licences are issued by It is the responsibility of the New Licence Holder to have the mooring Laid.

Hired Moorings | Application Form | Poole Harbour Commissioners

TWI has worked with a Member company to inspect steel mooring chain links for fine surface-breaking defects. TWI used a multi-disciplinary approach, combining both non-destructive testing (NDT) techniques and metallurgical theory, to thoroughly inspect the chain links. The consultants carried out some of the work on-site.
