"Investments, 8th edition, by Bodie, Kane, and Marcus keeps the best blend of practical and theoretical coverage while incorporating new and important topics in the world of investments. This text continues the tradition of an appropriate rigor and clear writing style for the MBA investments student. The unifying theme that security markets are nearly efficient, meaning that most securities are usually priced appropriately given their risk and return attributes, is continued in the 8th edition."--BOOK JACKET.

This text has a practical orientation with a wealth of examples and case studies. Recommended by the CIMA and ACCA, it includes new material on derivatives, treasury management and restructuring.

Fundamentals of Investments was written to: 1. Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.
