plant at a certain time.
This is the factor
which is the furthest
from its optimum level

at a particular point in
time. If we change the
limiting factor the rate
of photosynthesis will
change but changes
to the other factors
will have no effect on
the rate.

Investigating

Oxygen is liberated as a by-product and light is considered as a major factor to complete the process of photosynthesis.

Photosynthesis occurs when plants use light energy to convert carbon dioxide and water into glucose and oxygen.
