Who are we, and how do we relate to each other? Luciano Floridi, one of the leading figures in contemporary philosophy, argues that the explosive developments in Information and Communication Technologies (ICTs) is changing the answer to these fundamental human questions. As the

boundaries between life online and offline break down, and we become seamlessly connected to each other and surrounded by smart, responsive objects, we are all becoming integrated into an "infosphere". Personas we adopt in social media, for example, feed into our 'real' lives so that we begin to live, as Floridi puts in, "onlife". Following those led by Copernicus, Darwin, and Freud, this metaphysical shift represents nothing less than a fourth revolution. "Onlife" defines more and more of our daily activity - the way we shop, work, learn, care for our health, entertain

ourselves, conduct our relationships; the way we interact with the worlds of law, finance, and politics; even the way we conduct war. In every department of life, ICTs have become environmental forces which are creating and transforming our realities. How can we ensure that we shall reap their benefits? What are the implicit risks? Are our technologies going to enable and empower us, or constrain us? Floridi argues that we must expand our ecological and ethical approach to cover both natural and man-made realities, putting the 'e' in an environmentalism that can deal successfully with the new challenges posed by

our digital technologies and information society.

Half of all Americans live in areas subject to earthquake risk, and most Americans will travel to seismically active regions in their lifetime. FEMA is fostering awareness of earthquake risks in the United States through the newly developed FEMA P-530, Earthquake Safety at Home. FEMA P-530 is intended to show readers why earthquakes matter where they live, and how they can “Prepare, Protect, Survive, Respond, Recover and Repair” from an earthquake. This publication

will help readers become familiar with why and where earthquakes might occur. It discusses wide-ranging steps that readers can take to adequately prepare and protect themselves, their family, and their belongings. These include: developing family response plans, assembling earthquake disaster supplies, securing heavy objects and furniture, retrofitting a home, and more.
