Overtourism explores a growing phenomenon in tourism that is currently creating tensions in both urban and rural tourist destinations worldwide. This volume proposes a framework for a series of possible solutions and management strategies for dealing with overtourism and the various negative impacts that large quantities of tourists can impose. Questioning the causes of this phenomenon – such as increased prosperity and mobility, technological development, issues of security and stigma for certain parts of the world, and so on – this book supposes that better visitor management strategies and distribution of tourists can offset the negative impacts of overtourism. Individual chapters focus on a range of destinations including Venice, Barcelona and Dubrovnik, as well as UNESCO cultural and natural heritage sites, where local political actors and public authorities are not always able to deal with the situation effectively. Integrating research and practice, this book will be of great interest to upper-level students, researchers and academics in tourism, development studies, cultural studies and sustainability, as well as professionals in the field of tourism management.

Leisure Services Management, Second Edition, prepares students for the challenges they'll face as entry- to mid-level recreation and leisure managers. The book outlines the essential knowledge and skills that successful managers need to have and helps students build those competencies by encouraging them to think as managers. The text's activities, projects, and examples help students connect the competencies to real-world situations. Leisure Services Management begins by presenting a firm foundation of competency-based management. Students will learn what management is, what the manager's role is, and how their work affects their agency and their customers. They will also explore specific management areas such as marketing, financial management, human resources, employee development, communication, and evaluation. Throughout the text, students will be encouraged to apply their own experiences to the concepts being discussed to deepen their understanding of the profession. For each chapter, the authors provide experiential learning activities that simulate real on-the-job situations. Each of these activities asks students to assume one of the many roles of a new manager. They'll learn to deal with day-to-day management activities by completing work assignments and projects similar to those they'll assume as a manager. The activities will help students develop the competencies they'll need in order to meet the challenges of this evolving field. New to this edition of Leisure Services Management are the following student-friendly features: Updated sidebars in which professionals in the field offer early career advice for future managers Real examples from all three sectors—public, nonprofit, and commercial—giving a broad perspective of parks and recreation, tourism, sport, therapeutic recreation, and outdoor recreation International perspectives and examples, encouraging students to think globally Information about the exam for becoming a Certified Park and Recreation Professional (CPRP) The text also includes a web study guide, which includes links to sample forms from the actual files of leisure managers to assist students in understanding and using important management tools. With an overview of key concepts by chapter, detailed case studies, a glossary, and a competency scorecard, the web study guide will help students build their knowledge of the content area, apply the information learned to their current work environment or a future internship, and prepare for future certifications. The competency-driven approach of Leisure Services Management, Second Edition, assists readers in gaining the knowledge and practicing the skills needed to begin a career in leisure

management. Bolstered by the practical information in this text, new managers can contribute to the success of their organization as they enjoy the challenges and rewards of their new position.
