Magicians of the Gods - Wikipedia

The focus of Magicians of the Gods is Hancock's belief that the end of the Younger Dryas period was caused by a celestial impact. This asteroid strike, or multiple strikes as he believes that it split in the atmosphere, was primarily focused upon the ice shelf at the Canadian/US border and created the scablands that we see there today.

Deities, more commonly referred to as gods, are beings of immense magical power who operate on a level far above most magicians and magical creatures. The Old Gods are the primordial entities that are responsible for the creation of the universe, magic, life and reality itself, as well as the 'parents' of the modern deities of mythology. Alice stated that to the modern gods of myth, humans are ...

Graham Hancock's multi-million bestseller *Fingerprints of the Gods* remains an astonishing, deeply controversial, wide-ranging investigation of the mysteries of our past and the evidence for Earth's lost civilization. Twenty years on, Hancock returns with a book filled with completely new, scientific and archaeological evidence, which has only recently come to light... The evidence revealed in this book shows beyond reasonable doubt that an advanced civilization that flourished during the Ice Age was destroyed in the global cataclysms between 12,800 and 11,600 years ago. Near the end of the last Ice Age 12,800 years ago, a giant comet that had entered the solar system from deep space thousands of years earlier, broke into multiple fragments. Some of these struck the Earth causing a global cataclysm on a scale unseen since the extinction of the dinosaurs. At least eight of the fragments hit the North American ice cap, while further fragments hit the northern European ice cap. The impacts, from comet fragments a mile wide

approaching at more than 60,000 miles an hour, generated huge amounts of heat which instantly liquidized millions of square kilometres of ice, destabilizing the Earth's crust and causing the global Deluge that is remembered in myths all around the world. A second series of impacts, equally devastating, causing further cataclysmic flooding, occurred 11,600 years ago, the exact date that Plato gives for the destruction and submergence of Atlantis. But there were survivors - known to later cultures by names such as 'the Sages', 'the Magicians', 'the Shining Ones', and 'the Mystery Teachers of Heaven'. They travelled the world in their great ships doing all in their power to keep the spark of civilization burning. They settled at key locations - Gobekli Tepe in Turkey, Baalbek in the Lebanon, Giza in Egypt, ancient Sumer, Mexico, Peru and across the Pacific where a huge pyramid has recently been discovered in Indonesia. Everywhere they went these 'Magicians of the Gods' brought with them the memory of a time when mankind had fallen out of harmony with the universe and paid a heavy price. A memory and a warning to the future... For the comet that wrought such destruction between 12,800 and 11,600 years may not be done with us yet. Astronomers believe that a 20-mile wide 'dark' fragment of the original giant comet remains hidden within its debris stream and threatens the Earth. An astronomical message encoded at Gobekli Tepe, and in the Sphinx and the pyramids of Egypt, warns that the 'Great Return' will occur in our time...

With over 5 million copies sold worldwide of Fingerprints of the Gods, its New York Times bestselling sequel Magicians of the Gods brings new evidence supporting Hancock's thesis that a global cataclysm wiped out a great global civilization. On the heels of the very successful hardcover edition, Hancock returns with this paperback version including three new chapters brimming with recent reporting of fresh scientific advances (ranging from DNA to astrophysics) that substantially support his case. Twenty years ago, Graham Hancock published Fingerprints of the Gods an astonishing, deeply controversial investigation of the mysteries of and the evidence for Earth's lost prehistoric civilization. Twenty years after this massive bestseller debuted, Hancock returns with its sequel, filled with completely new scientific and archaeological evidence. Since 2007, a host of new proof has come to light supporting his theories through new archaeological discoveries. He travels to a wholly different set of ancient sites, including Gobekli Tepe, and brings entirely up to date and exciting material to the table for fans eagerly awaiting more evidence in favor of the prehistoric civilization. And, even more intriguing, he proposes an answer to the one question he could not answer in Fingerprints what caused this civilization to disappear. Magicians is poised perfectly for what his fans want to hear as well as for ushering in a new generation of readers.

Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology, and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. a long pause for thought.” —Kirkus Reviews In *Fingerprints of the Gods*, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind’s hidden past. In ancient monuments as far apart as Egypt’s Great Sphinx, the strange Andean ruins of Tihuanaco, and Mexico’s awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as-yet-unidentified civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement, and evolved scientific knowledge. A record-breaking number one bestseller in Britain, *Fingerprints of the Gods* contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past—and so our future. And *Fingerprints of God* tells us something more. As we recover the truth about prehistory, and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us, a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time—a cataclysm that may be about to recur. “Readers will hugely enjoy their quest in these pages of inspired storytelling.”—The Times (UK)

"I suspect the real breakthroughs in our understanding of consciousness are going to come from an entirely different direction. That direction, controversially, has to do with psychedelics--which, as many of the contributors to *The Divine Spark* argue, offer spectacular potential for the investigation of the 'hard problem' of consciousness." --from the introduction by Graham Hancock *Psychedelics: Medicinal? Vital in interspecies communication or communion with the sacred? Are you reaching enlightenment or damaging your brain? In this anthology, edited by bestselling author Graham Hancock, 22 writers discuss psychedelics and their myriad connections to consciousness. Travel to South America, the American Southwest, outer space, inner space, and back in time to revisit Pahnke's The Good Friday experiment.*

The Instant New York Times Bestseller! Was an advanced civilization lost to history in the global cataclysm that ended the last Ice Age? Graham Hancock, the internationally bestselling author, has made it his life's work to find out--and in *America Before*, he draws on the latest archaeological and DNA evidence to bring his quest to a stunning conclusion. We've been taught that North and South America were empty of humans until around 13,000 years ago – amongst the last great landmasses on earth to have been settled by our ancestors. But new discoveries have radically reshaped this long-established picture and we know now that the Americas were first peopled more than 130,000 years ago – many tens of thousands of years before human settlements became established elsewhere. Hancock's research takes us on a series of journeys and encounters with the scientists responsible for the recent extraordinary breakthroughs. In the process, from the Mississippi Valley to the Amazon rainforest, he reveals that ancient "New World" cultures share a legacy of advanced scientific knowledge and sophisticated spiritual beliefs with supposedly unconnected "Old World" cultures. Have archaeologists focused for too long only on the "Old World" in their search for the origins of civilization while failing to consider the revolutionary possibility that those origins might in fact be found in the "New World"?

culmination of everything that millions of readers have loved in Hancock's body of work over the past decades, namely a mind-dilating exploration of the mysteries of the past, amazing archaeological discoveries and profound implications for how we lead our lives today.

Powerful new evidence has emerged that supports Hancock's disturbing thesis of a massive global cataclysm in the window between 13,000 and 12,000 years ago, around the last Ice Age, that wiped out and destroyed almost all traces (except the 'fingerprints') of a great global civilisation of prehistoric antiquity. Hancock analyses the evidence emerging from popular science for events such as north America being struck by several pieces of a giant fragmenting comet, and the discovery in Turkey of an extraordinary 12,000 year-old megalithic site called Gobekli Tepe, on the scale of Stonehenge, but 7,000 years older than any of the great stone circles. Mysteries of this calibre drive the quest of Magicians of the Gods, each leading us to a labyrinth of further possibilities. Graham Hancock takes his original intuition of two phases of construction much further, exploring and investigating many mysterious ancient sites high in the Andes. His research also takes him to the Amazon, a rain forest that has been managed and cultured by human beings for millenia. From the Amazon, Graham follows the trail east, along the Atlantic ocean to the west coast of Africa, through the Sahara and on to Egypt. Magicians of the Gods satisfies the intellect and inspires the imagination. It transports readers for years to come with realms of mystery, enchantment and extraordinary possibilities.

The New York Times bestselling novel about a young man practicing magic in the real world, now an original series on SYFY “The Magicians is to Harry Potter as a shot of Irish whiskey is to a glass of weak tea. . . . Quentin Coldwater is brilliant but miserable. A high school math genius, he’s secretly fascinated with a series of children’s fantasy novels set in a magical land called Fillory, and real life is disappointing by comparison. When Quentin is unexpectedly admitted to an elite, secret college of magic, it looks like his wildest dreams have come true. But his newfound powers lead him down a rabbit hole of hedonism and disillusionment, and ultimately to the dark secret behind the story of Fillory. The land of his childhood fantasies turns out to be much darker and more dangerous than he ever could have imagined. . . . The prequel to the New York Times bestselling book *The Magician King* and the #1 bestseller *The Magician’s Land*, *The Magicians* is one of the most daring and inventive works of literary fantasy in years. No one who has escaped into the worlds of Narnia and Harry Potter should miss this breathtaking return to the landscape of the imagination.
