~~About COSMOS & ECOCERT | KORA Organics~~

Skincare cosmetics, including organic and natural ones, have become one of the major parts of the entire cosmetic market. According to 2017 consumer research conducted in the United States, more than half of consumers, both men and women, have purchased skincare cosmetics labelled as natural or organic.

Balanced coverage of natural cosmetics, and what it really means to be "green" The use of natural ingredients and functional botanical compounds in cosmetic products is on the rise. According to industry estimates, sales of natural personal care products have exceeded \$7 billion in recent years. Nonetheless, many misconceptions about natural products—for instance, what "green" and "organic" really mean—continue to exist within the industry. Formulating, Packaging, and Marketing of Natural Cosmetic Products addresses this confusion head-on, exploring and detailing the sources, processing, safety, efficacy, stability, and formulation aspects of natural compounds in cosmetic and personal care products. Designed to provide industry professionals and natural product development experts with the essential perspective and market information needed to develop truly "green" cosmetics, the book covers timely issues like biodegradable packaging and the potential microbial risks they present, the use of Nuclear Magnetic Resonance (NMR) to identify biomarkers, and chromatographic methods of analyzing natural products. A must-read for industry insiders, Formulating, Packaging, and Marketing of Natural Cosmetic Products provides the reader with basic tools and concepts to develop naturally derived formulas.

Recipes for 100+ natural beauty products and help understanding organic ingredients If you've spent hundreds of dollars looking for the perfect moisturizer, or shampoo, or anti-aging serum, but had no luck, then this book is for you. Written by a licensed pharmacist and expert healthcare professional, it contains not only more than 100 easy, all-natural recipes for face, hair, and body, it will also help

you to determine if a store-bought product is truly organic or natural by reviewing and explaining ingredients found in most of them. It's a comprehensive guide to understanding and making natural beauty products. Author Fifi Maacaron explains the basics, answers questions, and discusses techniques.

Sustainability has come to the fore in the cosmetics and personal care industry. Rising ethical consumerism and the need for resource efficiency are making cosmetic companies - small, independent firms to global giants - take steps towards sustainable development.

Sustainability: How the Cosmetics Industry is Greening Up discusses the growing importance of sustainability in the cosmetics industry, highlighting the various ways organisations can address the economic, environmental and social aspects. How can the cosmetics industry make a difference in terms of ingredients, formulations, packaging, CSR, operations, and green marketing? Topics covered include: Environmental and social impacts of cosmetic products Ethical sourcing and biodiversity Renewable energy and waste management Green formulations and ingredients Green marketing issues and consumer behaviour Green standards, certification schemes and indices in the cosmetics industry Industry experts share their experiences on how they are tackling the challenges of sustainability: from raw material procurements, manufacturing, business processes, to distribution and marketing to consumers. The book concludes with some future growth projections; what are some of the shortcomings in sustainability in the cosmetics industry and what can we expect to see in the future?

Sustainability: How the Cosmetics Industry is Greening Up discusses business and technical issues in all areas of sustainable product development, from sourcing ingredients, to formulation, manufacture and packaging. Covering a diverse range of subjects, this book appeals to professionals in many key sectors of the cosmetics and personal care industry; cosmetic chemists, formulation scientists, R&D directors, policy makers, business and marketing executives. It is also of relevance to academic researchers working in cosmetic chemistry and sustainable process development.

This book presents the proceedings of the International Science and Technology Conference "FarEastCon 2021," which took place on October 5-8, 2021, in Vladivostok, Russian Federation. The book discusses modern achievements and promising research in the sphere of intelligent technologies in solving real, applied problems in various fields of industry and economic policies of different countries. Featuring selected papers from the conference, this book is of interest to experts in various fields whose work involves developing innovative solutions and increasing the efficiency of economic activities.

Cosmetic manufacturers use nanoscale size ingredients to provide better UV protection, deeper skin penetration, long-lasting effects, increased color and finish quality. This approach enables the forming

of nanoscale cosmetic ingredients, which can possess active components readily absorbed into the skin, repair damage easily, and promote improved product outcomes. Nanotechnology for the Preparation of Cosmetics using Plant-Based Extracts explores the various applications of nanotechnology in the cosmetic industry. Techniques for the development of cosmetic are a topic of increasing interest with widespread opportunities for potential applications in a broad range of industrial applications. The book covers a variety of techniques and processes, focusing on its potential applications in the field of skincare and makeup cosmetics. The book will cover not only conventional processes but also innovative and efficient techniques for the preparation of cosmetics exhibiting unique applications in the field. Nanotechnology for the Preparation of Cosmetics using Plant-Based Extracts is an important reference source for materials scientists, engineers and pharmaceutical scientists who want to learn more about the use of cosmetics prepared through nanotechnology to achieve the materials characteristics and enhancements in the mechanism and properties of makeup and skincare. Presents techniques for the design and manufacture of high-performance skincare products using nanotechnology Demonstrates systematic approaches and investigations for the design, synthesis, characterization and applications of various plant-based extracts in order to make them effective ingredients for cosmetics creation Assesses the major challenges of using plant-based materials in the manufacture of cosmetic products

Are profits and sustainability compatible? This book brings unique perspectives to this key debate by exploring the history of green entrepreneurship since the nineteenth century, and its spread globally in industries including renewable energy, organic food, natural beauty, ecotourism, recycling, architecture, and finance. The book uses the lens of the extraordinary and often eccentric men and women who defied convention and imagined that business could help save the planet, rather than consume it. The social and religious beliefs that drove many of these individuals are explored as the book looks at how they overcame huge obstacles to execute their strategies. The green entrepreneurs seen here are shown to have created new markets and industries, and driven innovations in sustainable practices, even at times when most consumers and governments marginalized the entire subject. The struggles of early pioneers appear to have been rewarded by the growth of environmental awareness among consumers, business leaders, and others in recent years, but the Earth's environmental health continues to deteriorate. If profits and sustainability have proved challenging to reconcile, the book argues that one reason was how they were both defined.

Educating professionals and students about the chemistry, formulation technology, and related regulatory aspects of cosmetics and perfume Cosmetics and perfume comprise a multibillion-dollar global industry. Kirk-Othmer Chemical Technology of Cosmetics provides authoritative

information on the substances and processes involved, including key product groups, ingredients, formulation technology, packaging, and regulatory topics in twenty-two articles. This resource makes sense of a vast group of consumer products designed to improve the health, cleanliness, and physical appearance of the human exterior. It identifies natural and synthetic ingredients and gives details on formulation of the product so that the cosmetic is safe, easy to use, and performs as described. Particular attention is paid to the technologies that have been developed to produce them, including emulsification, stick technology, powder blending, and aerosol technology. Packaging is also addressed, as it must be attractive to the consumer, be environmentally friendly, and keep the product safe as well. Regulatory information reinforces the safety aspect. Based on Wiley's renowned Kirk-Othmer Encyclopedia of Chemical Technology, this book presents new and carefully updated articles, and features the same breadth and quality of coverage and clarity of presentation found in the original. This comprehensive guide is a valuable resource for chemists, R&D professionals, dermatologists, patent attorneys, regulatory agencies, and other professionals in the field of personal care products. It is also a must-have reference for students who plan to enter the field.

Packed with pampering recipes to create your own beauty essentials for face, body, and hair. Most of us use a huge variety of beauty products on our skin and hair every day - from shower gel and shampoo to moisturizer and hand cream - but the majority of these products contain a variety of chemicals. In *Natural Beauty*, natural skincare and fragrance expert Karen Gilbert shows you how to make your own lotions and potions at home, using readily available, natural ingredients and easy-to-follow methods. For the face, there are moisturizers, masks and cleansers; for the body choose from scrubs and shower gels, soaps and body lotions. And when you need some extra-special pampering, try the recipes for lip balms, massage bars, bath oils and eye gels. So try your hand at making a neroli hydrating spritz or a macadamia and jojoba moisturizer, a mango and lime body butter or lemon and tea tree foot balm, bergamot and grapefruit wake-up wash or cocoa butter lip balm - the hardest part is choosing which of the pampering projects to try first! Each recipe has clear step-by-step photographs to guide you, and there are numerous variations to try.

After the birth of their son, Jay Sinha and Chantal Plamondon set out on a journey to eliminate plastic baby bottles as the Canadian government moved to ban BPA. When they found it was difficult to procure glass baby bottles, Jay and Chantal made it their mission to not only find glass and metal replacements for plastic, but to make those products accessible to the public as well. Printed on FSC-certified paper and with BPA-free ink, *Life Without Plastic* strives to create more awareness about BPA-based products, polystyrene and other single-use plastics, and provides readers with ideas for safe,

reusable and affordable alternatives. While plastic has its uses in technology, the medical and industrial sectors and some products around the home, single-use plastics may release chemicals when they come in contact with food and water. These disposable plastics are commonly used to package food and drinks as well as personal care and cleaning products. Jay and Chantal show readers how to analyze their personal plastic use, find alternatives and create easy replacements in this step-by-step guide. Get your family healthier, spread consciousness and radiate positive plastic-free energy by taking action to help the environment.

Cosmetics are the most widely applied products to the skin and include creams, lotions, gels, and sprays. Their formulation, design, and manufacturing ranges from large cosmetic houses to small private companies. This book covers the current science in the formulations of cosmetics applied to the skin. It includes basic formulation, skin science, advanced formulation, and cosmetic product development, including both descriptive and mechanistic content with an emphasis on practical aspects.
