This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

Covers every aspect of knowledge—scientific, intellectual, and historical—from the beginning of the human experience into the twenty-first century and beyond

First published in Rome in 1535,Leone Ebreo's Dialogues of Love is one of the most important texts of the European Renaissance. Well known in the Italian academies of the sixteenth century, its popularity quickly spread throughout Europe, with numerous reprintings and translations into French, Latin Spanish, and Hebrew. It attracted a diverse audience that included noblemen, courtesans, artists, poets, intellectuals, and philosophers. More than just a bestseller, the work exerted a deep influence over the centuries on figures as diverse as Giordano Bruno, John Donne, Migueldel Cervantes, and Baruch Spinoza. Leone's Dialogues consists of three conversations - 'On Love and Desire,' 'On the Universality of Love,' and 'Onthe Origin of Love' - that take place over a period of three subsequent days.They are organized in a dialogic format, much like a theatrical representation, of a conversation between a man, Philo, who plays the role of the lover andteacher, and a woman, Sophia, the beloved and pupil. The discussion covers a wide range of topics that have as their common denominator the idea of Love. Through the dialogue, the author explores many different points of view and complex philosophical ideas. Grounded in a distinctly Jewish tradition, and drawing on Neoplatonic philosophical structures and Arabic sources, the work offers a useful compendium of classical and contemporary thought, yet was not incompatible with Christian doctrine. Despite the unfinished state and somewhat controversial, enigmatic nature of Ebreo's famous text, it remains one of the most significant and influential works in the history of Western thought. This new, expertly translated and annotated English edition takes into account the latest scholarship and provides aninvaluable resource for today's readers.

From generation to generation, people experience their landscapes differently. Humans depend on their natural environment: it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities (such as droughts, famines, floods and landslides) need to be appeased. We presume that, in many societies, lakes, rivers, rocks, mountains, caves and groves were considered sacred. Individual sites and entire landscapes are often associated with divine actions, mythical heroes and etiological myths. Throughout human history, people have also felt the need to monumentalize their sacred landscape. But this is where the similarities end as different societies had very different understandings, believes and practices. The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality, textuality and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were 'rewritten', adapted and redefined in the course of time to suit new cultural, political and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed and monumentalized – especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative humannmade, seemingly 'non-natural' landscape, with perfectly astronomically aligned buildings that define a cosmological order? Sacred Landscapes therefore aims to analyze the complex links between landscape, 'religiosity' and society, developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic, holistic, contextual and historical perspective.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

"Icke lays out in dot-connected detail a lifetime of research and insight about our 'computer'-simulated reality, the holographic universe, and the hidden non-human forces that are manipulating human life via hybrid bloodline families and networks into a global Orwellian state of total control"--P. [4] of cover.

Organized by such common subjects as Home, Work, Dining Out, Transportation, Health, and Sports, these bilingual visual dictionaries give students, travelers, and business people quick access to foreign terms in the simplest and most intuitive way.
