From the best-selling author and rewilding pioneer Isabella Tree, When We Went Wild is a heartwarming, sustainably printed picture book about the benefits of letting nature take the lead, inspired by real-life rewilding projects. Nancy and Jake are farmers. They raise their cows and pigs, and grow their crops. They use a lot of big machines to help them, and spray a lot of chemicals to get rid of the weeds and the pests. That's what all good farmers do, isn't it? And yet, there is no wildlife living on their farm. The animals look sad. Even the trees look sad! One day, Nancy has an idea... what if they stopped using all the machines, and all the chemicals, and instead they went wild? The author's own experience of rewilding her estate at Knepp in West Sussex, England, has influenced conservation techniques around the world that are bringing nature back to the countryside and bringing threatened species back from the brink. Ivy Kids brings you beautiful, sustainably printed books to rewind your child. They are hopeful, joyful stories and nonfiction about nature and the environment that are charmingly illustrated and printed on 100% post-consumer recycled paper, locally in the US, and using renewable energy. Praise for Wilding, the author's best-selling memoir: "In a story that is part personal memoir, part work of conservation, Tree reveals the capacity of the wild to reclaim the land--as long as humans step out of the way. " --Smithsonian, "The Ten Best Science Books of 2018" "Wilding is both a timely and important book. " --Tim Flannery, The New York Review of Books

Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.
