Decades of research have demonstrated that the parent-child dyad and the environment of the family – which includes all primary caregivers – are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills,

charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

The author of *Punished by Rewards and The School Our Children Deserve* builds on his parenting theories of working with children rather than trying to control them, argues against practices that teach children that they must earn a parent's approval, and presents techniques that promote desired child qualities through unconditional support. Dear Parent: This guide will explain what you can expect from the book, how it is structured, and the educational principles on which it is based. It will also walk you through the book's major components and how to implement them. As the parent, you will need to provide certain things for your teen or preteen to gain the book's full value. *The Parent's Role in Fostering Good Studentship* Every conscientious parent wants their child to do well in school, but not all parents know how to make that happen. They tell their child to study hard and to take school seriously, but that usually isn't enough. They then may resort to nagging, scolding, or threatening, which only makes things worse. Many loving parents had trouble in school themselves and really don't know the solution to their child's problems. Kids need three things to turn around a losing streak in the classroom: 1) They need to be motivated, to be given reasons why they should study and work hard. 2) They need to be shown that they can be successful if they do this. 3) And they need to be shown how to do it: what studying and working hard in school actually means. This book will address all three issues. But by itself, it is only a book, a bunch of information buried between two pieces of cardboard. To get the knowledge out of the book and into the head and heart of your student, a facilitator is needed. That facilitator is you. (Or it could be another adult whom your child respects acting in the role of a mentor. *The Student's Advantage: Your Guide to Getting the Most out of School and Creating a Fabulous Future* will empower students who have been struggling in middle and high school to maximize their capabilities and will inspire good students to transform themselves into great students. All too often students do not really understand why they need to learn. With US academic performance in decline, particularly in science and math, the time has come to tackle the question of why students are not doing better, and to
