Power to and on the
PCB is also one of first
things you should
check, check that a good
5 volts is getting to the
chips on the board.

Read PDF Pcb Repair User

Measure the voltage on the actual chips across the board, a small voltage drop across a board is normal, you may have a good 5V on the jamma edge but if that drops to 4.5V at the other end of the board then things could get weird.
