Population Development And Political Process  
Credit: Finance & Development, International Monetary Fund (IMF) WASHINGTON DC, Mar 17 2020 (IPS) - "Demography is destiny" is an oft-cited phrase that suggests the size, growth, and structure of a nation's population determines its long-term social, economic, and political fabric. The phrase highlights the role of demographics in shaping many complex challenges and opportunities societies face, including several pertinent to economic growth and development.

Population Development And Political Process In India  
Population growth, unleashed by sustained mortality decline or by migration, is a force of its own in the development process, sometimes seeming to promote development, more often impeding it, and always diluting its achievements. While countries are the principal level at which such relationships have their effect, the influence of population change can extend to broader regional development and even to the global economy, with implications too for geopolitics and major environmental systems.

Population Development And Political Process In India  
Causes of stability and instability. Although it is possible to identify a number of factors that obviously have a great deal to do with contemporary development and change in the world's political systems—industrialization, population growth, the "revolution of rising expectations" in the less developed countries, and international tensions—there is no agreed theory to explain the causes of political change.
