An authoritative, up-to-date survey of the state of the art in cognitive science, written for non-specialists.

Master the Mechanical Aptitude & Spatial Relations Tests provides the key to test-prep success on exams measuring spatial relations, symbol reasoning, and mechanical aptitude for training and employment opportunities in the military, civil service, technical schools, and private industry. Featuring practice questions covering all major exam topics-including hidden figures, tool knowledge, and mechanical insight-with overviews of concepts that appear on mechanical aptitude/spatial relations exams, such as visual-motor coordination and pattern analysis. The book also includes detailed subject reviews, along with charts and diagrams to illustrate answers.

This book shows teachers and other human service professionals working in school settings how to employ non-aversive, behavior analysis principles in classrooms and other school settings. Marked by its clear writing and multitude of real-classroom examples, this book is appropriate for undergraduate and graduate courses in teacher education, special education, school psychology, and school counseling. Behavior Analysis for Effective Teaching makes a perfect text for one of the five required courses for the Credentialing Exam of the Behavior Analysis Certification Board (BACB). Outstanding features include:

- A classroom focus that seamlessly integrates behavior management with effective classroom instruction.
- Up-to-date research covering topics such as tag teaching, precision teaching, verbal behavior, autism, and computer-aided instruction.
- Pedagogical strategies including in-chapter quizzes and problem-solving exercises.
- A companion website featuring instructor test banks, illustrative videos, and further resources.
