media for artificial neural  
inference

Abstract: We introduce  
an electro-optic  
hardware platform for  
nonlinear activation  
functions in optical  
neural networks. The  
optical-to-optical  
nonlinearity operates by  
converting a small  
portion of the input  
optical signal into an  
analog electric signal,

# Acces PDF Selected Papers

which is used to intensity  
-modulate the original  
optical signal with no  
reduction in processing  
speed.
