In this sweeping history, bestselling author Amy Chua explains how globally dominant empires—or hyperpowers—rise and why they fall. In a series of brilliant chapter-length studies, she examines the most powerful cultures in history—from the ancient empires of Persia and China to the recent global empires of England and the United States—and reveals the reasons behind their success, as well as the roots of their ultimate demise. Chua's analysis uncovers a fascinating historical pattern: while policies of tolerance and assimilation toward conquered peoples are essential for an empire to succeed, the multicultural society that results introduces new tensions and instabilities, threatening to pull the empire apart from within. What this means for the United States' uncertain future is the subject of Chua's provocative and surprising conclusion.

'Malala is an inspiration to girls and women all over the world.' - J.K. Rowling Written by Malala in collaboration with critically acclaimed author, Patricia McCormick, this children's edition tells the remarkable story of a girl who knew from a young age that she wanted to change the world - and did. Her journey will open your eyes to another world and will make you believe in hope, truth, miracles, and the determination of one person to inspire change. The medieval period of Persia's remarkably continuous, history began with its conquest by the Muslim Arabs in the seventh century AD and gave way to the modern period at the end of the eighteenth century when the influence of the West became pervasive. Without an understanding of the confused legacy of these centuries, no-one can hope to understand the complexities and dynamism of modern Iran. Concise, clear and colourful, David Morgan's book is the best and most up-to-date short account of its subject in the English language.
