Hockey Night in Canada has reached a great age (and for television, practically an immortal one) because it made itself into something that Canada couldn't live without. It is this surge of emotion that connected us all each week, and which connects us through the years to now. Hockey Night in Canada didn't just aim a camera at a game and observe what happened-it actively gave the country a prism through which it could see itself and its evolving diversity. We look where the eye of Hockey Night in Canada looks, and it looks at us. We remember what it remembers. We feel what it feels. That is the dynamic that has made the show much more than a long-lived TV success; it is a cultural juggernaut. Ask fans where they saw their first hockey game, and chances are it was on Hockey Night in Canada. Ask the players-male or female-what first got them into the rink, and the answer will be the same: they wanted to be like the players on Hockey Night in Canada.

Ancient Greek Beliefs explores the mysteries of the ancient myths and religious beliefs of a great people. The text is divided into three sections, Greek mythology, the ancient Greeks, and conclusions. A brief history and lengthy glossary are included. The book is designed as a basic text for the introduction to ancient Greek mythology and beliefs, and the text muses about the religious lessons we might learn from them. It contains abridged stories of Greek mythology, including the extant Greek plays, and considers portions of the works of the great writers, including Aeschylus, Euripides Hesiod, Homer, Plato, and Sophocles. It opens a comprehensive window into the lives of these great ancient people.

A new play from an award-winning playwright, published as part of the innovative Abbey Theatre playscript series On the day of her father's funeral, Eva - a young woman - is still haunted by the betrayal she witnessed from her childhood haven - the treehouse in the garden. On the same day another woman, Magda, relives the ghosts of another hiding place and a different betrayal - ghosts from which she still seeks forgiveness. Interweaving lives and secrets Treehouses is a magical tale of refuge, treachery and of love lost and found.

Major new fiction from an acclaimed master From the prizewinning writer Stuart Dybek comes a superb new work: a novel-in-stories, eleven masterful tales told by a single voice with remarkable narrative power. In *I Sailed With Magellan*, Dybek finds characters of irrepressible vitality amidst the stark urban landscapes of Chicago's south side; there, the daily experiences of the neighborhood are transformed in the lush imaginative adventures of his hero, the restless Perry Katzek. There is remarkable music in each of Dybek's intertwined episodes, the rhythm of street life captured in all its emotional depth and unexpected humor: a man takes his young nephew to a string of taverns where the boy sings for his uncle's bourbon; a small-time thug is distracted from making a hit by the mysterious reappearance of several ex-girlfriends; two unemployed youths hatch a scheme to finance their road trip to Mexico by selling orchids stolen from the rich side of town; a young couple's amorous beach adventure is interrupted when an unexpected visitor washes ashore. As these poignant, often funny chapters unfold, Perry grapples toward the exotic possibilities the world offers him, glimpsing them even beneath the at times brutal surface of the inner-city. Throughout *I Sailed With Magellan*, fans of Dybek will find the captivating storytelling, the sharp, spare prose, the brilliant dramatization of resilient, inventive humanity that they have come to expect from him.

Expressive Therapies Continuum is distinctive in its application as a foundational theory in the field of art therapy. First developed by Vija Lusebrink, this theory can be used by persons of any theoretical orientation, and has the ability to unite art therapists of varying backgrounds. The information contained in this book demonstrates how the Expressive Therapies Continuum provides a framework for the organization of assessment information, the formulation of treatment goals, and the planning of art therapy interventions. It provides rich clinical detail and many case examples that enliven the text and promote student engagement and learning. Hinz divides material into three parts. The first describes the historical roots of the Expressive Therapies Continuum and pays homage to contributions from the fields of art and psychology. The seven component parts of the ETC are examined in the second part, and the last part of the book is dedicated to assessment and clinical applications. This book 's easy-to-use format and effectiveness in teaching history and application make it an essential reference for therapists and students.

Illuminating the moral dilemmas that lie at the heart of a slaveholding society, this book tells the story of a young slave who was sexually exploited by her master and ultimately executed for his murder. Celia was only fourteen years old when she was acquired by John Newsom, an aging widower and one of the most prosperous and respected citizens of Callaway County, Missouri. The pattern of sexual abuse that would mark their entire relationship began almost immediately. After purchasing Celia in a neighboring county, Newsom raped her on the journey back to his farm. He

then established her in a small cabin near his house and visited her regularly (most likely with the knowledge of the son and two daughters who lived with him). Over the next five years, Celia bore Newsom two children; meanwhile, she became involved with a slave named George and resolved at his insistence to end the relationship with her master. When Newsom refused, Celia one night struck him fatally with a club and disposed of his body in her fireplace. Her act quickly discovered, Celia was brought to trial. She received a surprisingly vigorous defense from her court-appointed attorneys, who built their case on a state law allowing women the use of deadly force to defend their honor. Nevertheless, the court upheld the tenets of a white social order that wielded almost total control over the lives of slaves. Celia was found guilty and hanged. Melton A. McLaurin uses Celia's story to reveal the tensions that strained the fabric of antebellum southern society. Celia's case demonstrates how one master's abuse of power over a single slave forced whites to make moral decisions about the nature of slavery. McLaurin focuses sharply on the role of gender, exploring the degree to which female slaves were sexually exploited, the conditions that often prevented white women from stopping such abuse, and the inability of male slaves to defend slave women. Setting the case in the context of the 1850s slavery debates, he also probes the manner in which the legal system was used to justify slavery. By granting slaves certain statutory rights (which were usually rendered meaningless by the customary prerogatives of masters), southerners could argue that they observed moral restraint in the operations of their peculiar institution. An important addition to our understanding of the pre-Civil War

era, Celia, A Slave is also an intensely compelling narrative of one woman pushed beyond the limits of her endurance by a system that denied her humanity at the most basic level.

For Senior-level and graduate courses in Biochemical Engineering, and for programs in Agricultural and Biological Engineering or Bioengineering. This concise yet comprehensive text introduces the essential concepts of bioprocessing-internal structure and functions of different types of microorganisms, major metabolic pathways, enzymes, microbial genetics, kinetics and stoichiometry of growth and product information-to traditional chemical engineers and those in related disciplines. It explores the engineering principles necessary for bioprocess synthesis and design, and illustrates the application of these principles to modern biotechnology for production of pharmaceuticals and biologics, solution of environmental problems, production of commodities, and medical applications.
