*Stem Cells in Aesthetic Procedures: Art, Science, and ...*

The marketing and promotion of stem cell procedures in aesthetic surgery is not adequately supported by clinical evidence in the majority of cases. Conclusions: Stem cells offer tremendous potential, but the marketplace is saturated with unsubstantiated and sometimes fraudulent claims that may place patients at risk.

*The role of stem cells in aesthetic surgery: fact or fiction?*

Stem Cells Enriched Lipotransfer (CAL). Each has its uses. The term microlipofilling is very appropriate because it defines well the technique, due to its smaller particle size compared to conventional macro fat graft. Microlipofilling can be performed percutaneously or by injecting the fat directly under the skin flap into the underlying tissues.

and have even been used in the cloning of sheep. 4 To add to their various and diverse range of uses, they are now being utilised in daily skincare regimes.

### *Stem Cells - Aesthetics*

The two procedures differ in the uses after the stem cells are harvested. In medical procedures, stem cells are injected as treatments (in joints, for example) or given intravenously (IV). However, in cosmetic procedures, stem cells are used to improve skin health and or augment other anti-aging aspects.
