ENHANCEMENT, Black Market DNA, Volume 1, ISBN: 9781501050794, Thunderbird Media by Anthony J. Melchiorri is a Sci-fi thriller set in 2058. We are introduced to Christopher Morgan as he is being knifed in a prison riot only to be saved by a huge inmate whom he barely knows.

Enhancement (Black Market DNA Book 1) eBook: Melchiorri ...
The third installment of Anthony Melchiorri's Black Market DNA series is my favorite yet. Another great blend of science and action that makes author Melchiorri a must read for those that enjoy an imaginative and good, modern medical thriller.. This time we see Chris struggling to put his life back together while balancing a relationship with Robin.

Market DNA Book 2) at Amazon.com. Read honest and unbiased product reviews from our users.

Ray Willis est un homme brisé. Cet ancien médecin légiste connu et reconnu en est aujourd'hui réduit à préparer les corps des défunts pour les pompes funèbres du quartier. Il estime son génie scientifique lamentablement gâché... Du moins jusqu'à ce que son criminel de frère Denny arrive sur le pas de sa porte, avec une offre comme on n'en voit passer qu'une fois dans sa vie : la recette d'un produit capable d'éliminer toutes les maladies sur Terre. La fortune assurée ! La clé de ce remède miracle ?... elle se trouve dans l'ADN des super-héros. Frank J. Barbieri et Victor Santos jouent avec la mythologie des super-héros pour nous proposer un récit pulp à l'humour noir décapant et aux dialogues incisifs. Black Market, c'est la rencontre entre des anti-héros dignes de Breaking Bad et des justiciers en collants mais pas très flamboyants !

Under Denny's coercion, Ray has successfully procured and sold his first batch of Super DNA on the black market. The scary part? He's a natural, so much so that he and Denny need to expand their operation by bringing in some added muscle—a former hero with an axe to grind against the Supers who forced him out of the life.

In the year 2058, Baltimore's latest crime epidemic is illegal genetic enhancements. Convicted dealer Christopher Morgan swears off black market genetics for good. Before he's even released from prison, he finds himself on a hit list. Someone wants Chris dead and he has no idea why. Once released, Chris takes the first job he's offered. But, soon after, the new boss at his lab is murdered. Chris fears it has something to do with his past—and so do the police. He enlists the help of a close colleague, Tracy Harrow, to clear his name and search for answers. They discover a shocking connection between Chris and the other names on the hit list. In a perilous race against time, Chris and Tracy realize that far more is at stake than just Chris's life. Together, they uncover a dark conspiracy that goes deeper into the world of bioengineering and genetic enhancements than they could have imagined. Enhancement is a fast-paced, near-future thriller about genetic engineering, organized crime, and the abuse of advanced technology.

Enhancement is a fast-paced, near-future thriller about genetic engineering, organized crime, and the abuse of advanced technology.

Ray Willis is a broken man, a disgraced medical examiner making ends meet by preparing corpses at a funeral parlor. His scientific genius is being wasted—that is, until his estranged criminal brother Denny shows up on his doorstep, supposedly cleaned up and proposing a once-in-a-lifetime partnership to cure not just cancer, but all disease. The catch? It exists within the DNA of superheroes. A dark exploration of superpowers in the tradition of IRREDEEMABLE and SLEEPER, writer Frank J. Barbiere (FIVE GHOSTS) and artist Victor Santos (POLAR) come together for a truly modern take on superheroes. This collected edition contains the entire critically-acclaimed miniseries.

Bizarre celebrity thefts are occurring all over the world: A piece of hair from John Lennon, Julia Roberts' bed linens, and Sheela Marks, Hollywood's hottest actress, is constantly being approached in odd ways by obsessed fans literally out for a piece of her. Paranoid and desperate for her own safety, she turns to her security expert, ex-Marine Lymon Bridges, who must match wits with his most formidable opponent yet. One of Bridges's new recruits, Christal Anaya, was a hot shot FBI agent who recently lost her job due to a major slip-up during one of the agencies most sought after cases. Now Bridges hopes to use her investigative expertise to unveil the perpetrator behind these "attacks." But what she finds is far stranger than anything coming out of Hollywood. A major genetics firm has been all over the world, kidnapping the best genetic scientists to use their expertise in a bizarre black market trade of celebrity DNA, and its megalomaniacal mastermind will stop at nothing until the world is as beautiful as Hollywood's A-list. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

New York Times bestselling author Daniel Suarez delivers an exhilarating sci-fi thriller exploring a potential future where CRISPR genetic editing allows the human species to control evolution itself. On a crowded train platform, Interpol agent Kenneth Durand feels the sting of a needle—and his transformation begins... In 2045 Kenneth Durand leads Interpol's most effective team against genetic crime, hunting down black market labs that perform "vanity edits" on human embryos for a price. These illegal procedures augment embryos in ways that are rapidly accelerating human evolution—preying on human-trafficking victims to experiment and advance their technology. With the worlds of genetic crime and human trafficking converging, Durand and his fellow Interpol agents discover that one figure looms behind

it all: Marcus Demang Wyckes, leader of a powerful and sophisticated cartel known as the Huli jing. But the Huli jing have identified Durand, too. After being forcibly dosed with a radical new change agent, Durand wakes from a coma weeks later to find he's been genetically transformed into someone else—his most wanted suspect: Wyckes. Now a fugitive, pursued through the genetic underworld by his former colleagues and the police, Durand is determined to restore his original DNA by locating the source of the mysterious—and highly valuable—change agent. But Durand hasn't anticipated just how difficult locating his enemy will be. With the technology to genetically edit the living, Wyckes and his Huli jing could be anyone and everyone—and they have plans to undermine identity itself.

The government said the Variants were dying off... That the beasts would be extinct in a matter of years... That the Allied States had returned to prosperity and freedom ... The government was dead wrong. Deep under the cities, the Variants weren't just hiding, they were breeding. While the human survivors of the Extinction Cycle built outposts and brought back industries, the monsters were building something of their own. Working with human collaborators, they constructed a vast underground organic network to control this new army and launch a blitzkrieg assault across the Allied States. After tunneling under the walls, the beasts managed to overwhelm even the most fortified outposts. Many of them fell within days, forcing the military to abandon bases and retreat. But not everyone is on the run. Team Ghost hunts a monster behind enemy lines that could change the tide of war. On the USS George Johnson, Doctor Kate Lovato and her team of scientists seek to understand and tap into the Variant network while oil tycoon S.M. Fischer and his engineers come up with a plan to help buy time for the remaining outposts. And, at Outpost Portland, Captain Reed Beckham and Master Sergeant Parker Horn investigate a frightening conspiracy involving the human collaborators. As the Variant armies surge across the Allied States, those working to stop them realize even desperate measures may not be enough to prevent the total annihilation of their country.

Immortality is within reach. In 2063, a biotechnological revolution sweeps the nation. Behind this movement is Chicago-based medical giant LyfeGen. The company leads the biotech industry with their Sustain, an implantable artificial organ designed to grant its recipients near-immortality. But many of those recipients are suddenly dying. Biomedical scientist Preston Carter developed the Sustain to improve and save lives. Yet there are others that would see him fail. Extreme religious groups, radical movements, and competing corporations would prefer to see LyfeGen collapse rather than allow "the god organ" to fundamentally alter medicine and the human body. In a race against time, Carter must learn to trust resourceful journalist Audrey Cook. She may hold the key to discovering who is sabotaging the Sustain. And with the organ already implanted in his own body, Carter must uncover the truth before he's killed by his invention. THE GOD ORGAN is a near-

future medical thriller that takes the reader on a suspenseful ride filled with sinister conspiracies, intriguing biomedical science, and rampant corruption that will leave readers wondering just how dangerous becoming a god may really be.

Receiving mysterious clues about a shooting murder in Montreal, Tempe Brennan wonders if the victim may have been a Jewish black market antiquities trader and teams up with detective Andrew Ryan and biblical archaeologist Jake Drum for a dangerous investigation in Israel. By the author of Monday Mourning. Reprint.
