Per l'onnivoro il dilemma di cosa mangiare influenza la longevità e la qualità della vita, l'insorgenza delle malattie croniche e condiziona la scelta alimentare. Al contrario l'alimentazione a base-vegetale, al netto della salute e del benessere, offre una libertà di scelta ben più ampia e può essere seguita in tutte le epoche della vita, in accordo con quanto dichiarato dall'American Dietetic Association: «le diete vegetariane correttamente pianificate, comprese le diete totalmente vegetariane o vegane, sono salutari, adeguate dal punto di vista nutrizionale, e possono conferire benefici per la salute nella prevenzione e nel trattamento di alcune patologie. Le diete vegetariane ben pianificate sono appropriate per individui in tutti gli stadi del ciclo vitale, ivi inclusi gravidanza, allattamento, prima e seconda infanzia e adolescenza, e per gli atleti». [Position of the American Dietetic Association: vegetarian diets. J Am Diet Assoc. 2009 Jul; 109 (7):1266-82.].
