In these case studies, you will find detailed information about the key design elements and unique features of 19 multi-national, national, regional and local emissions trading systems that are operating or being considered to address climate change.

The world's carbon markets | Environmental Defense Fund

This market punishes businesses that emit more than the limit, while rewarding those who emit less. Thus, the carbon market provides environmental efficiency in the use of resources. Although the value of the European Union Emissions Trading market was \$11 billion in 2005, it reached \$176 billion in 2011 (Narin, 2013). This increase in 6 years is promising for the future of the carbon market because it can encourage businesses and countries to use clean technology.

Carbon Market - an overview | ScienceDirect Topics

Carbon emissions trading has been steadily increasing in recent years. According to the World Bank's Carbon Finance Unit, 374 million metric tonnes of carbon dioxide equivalent (tCO 2 e) were exchanged through projects in 2005, a 240% increase relative to 2004 (110 mtCO 2 e) which was itself a 41% increase relative to 2003 (78 mtCO 2 e).
